Industrial Development In News-Bulletin Territory

This summer has witnessed many industrial developments in the territory in which this paper circulates, and in view of this fact this edition is being issued to give our readers an idea of some of the noteworthy things that have and are being done.

Among the outstanding features in this issue are special articles and illustrations by the

Rock Island Lines, the Public Service Company of Northern Illinois, and Chas. M. Hayes, President of the Chicago Motor Club.

Orland Park and Worth Show Real Progress

CHURCH CONSOLIDATION MAKES FOR BETTER CHURCH AND COMMUNITY ADMINISTRATION

A great step forward in the field of church and community administration has been made possible in the union of the Community church of Worth and the Methodist church of Orland under the leadership of Rev. Paul T. Sanders.

The eyes of the church world over the country are directed to this new venture because it will be one of the first consolidated suburban parishes in the country. The plan has been tried in the rural field with great success but never in such a way in the suburban area.

Dr. Beck and Prof. Mans of Garrett Biblical Institute are backing the project as they hope under Rev. Sanders guidance to train men to direct such parishes in other parts of the country.

In this plan Rev. Sanders will direct the work in both communities. He will be assisted in the work by Rev. DeLong and Rev. Povenmire. Rev. DeLong will direct the boys work in Worth, teach in the Sunday School there and have charge of the morning service. He will go to Orland in the afternoon and take charge of the young peoples service and evening worship. Rev. Povenmire will have charge of the boys work in Orland, teach in the Sunday school there and have charge of the morning service. He will go to Worth in the afternoon to supervise the young peoples service and have charge of the evening service there. He will also direct the Orland choir and have charge of dramatics in each place.

Rev. Sanders will supervise the work in both places and do the pastoral work. He will also preach in each community every other Sunday morning. He will also direct the community program thus serving the community at large.

With this arrangement the two communities will have the services of one full time man and two part time men instead of a part time student minister in each community as in past years. This will make possible an active boys program including boy scouts and athletic clubs for each community under the direction of men who are expert in the work. It will also mean a program for the young girls of the community, such as girl scouts, girl choir and many other activities. There will be an active young peoples program taking care of the social and religious development of the young people. It will also mean that the pastor will be able to

visit the homes of the people thus ministering in a way that has long been neglected. It will include a run community program meeting the needs of the entire community both young and old.

The two church congregations will have the advantage of hearing three men preach in place of one man as before. Thus meeting the needs of all the people because if they don't like one man's sermons they might like the others style.

Rev. Sanders has demonstrated in his work at Worth in the past three years that a church can serve the entire community regardless of creeds or doctrines. His policy is that the church is not an end in itself but rather a means to serving the community. He hopes to carry this policy out in the new arrangement. Because the only reason for the existence of the church in the community is to serve the needs of the community. The day of narrow denominationalism is past. All people are the sons and daughters of the same God, therefore all must be served in the same way. This will be the policy of the Orland and Worth Consolidated parish as outlined by Rev. Sanders.

This is a wonderful opportunity for the people of Orland and Worth to back a public venture that will bring development to the community life. The success or failure of the plan depends on the people of the community.

Worth Model Home Finished

The Model home erected by the building association of the local Good Fellowship Club under the direction of the committee of Mr. A. Crandall, Mr. Carl Bishop and Mr. Preller is now completed. This is a great boost to the community as it is the first of its kind to be erected in this section.

It is a beautiful building in every respect built of a new composition tile. The inside finished up with the very latest improvements everything built of the best material. The construction work was let to Mr. Bohne contractor of Worth, his work was very fine and will be a good advertisement for him in the community. Mr. A. Crandall chairman of the committee has spent much time in the supervision of the building. In this he has shown a won-

derful public spirit.

The building will be held for inspection for a short time and then sold. It will be a fine home for the lucky purchaser.

Worth Organizing Local Bank

Worth Bank Well Underway

The community of Worth will soon have a bank of its own. A charter has been taken out and much stock has been sold. It is in the hands of very reliable men in the community and has the backing of the best people of Worth. It is felt that there is ample field for a banking institution in the village. It will render service to the community and be a great boost to the community development.

Worth Working On Zoning Plan

The Planning Commission composed of Mr. A. Crandall, Mr. Henry Stewart, Mr. Carl Bishop, Rev. Sanders and Mr. Preller is now busy working on the zoning plan of the village of Worth and will soon have something to submit to the village as a whole.

The work of this body is very difficult and very important as the future of the community hangs in their hands. It is very important that no more mistakes be made in the village development and it requires careful planning in the placing of streets, buildings and other improvements.

Worth Safeguards Village Health

Under the guidance of Miss O'Connor, Worth is reaping the benefit of expert advice on health and sanitation. Miss O'Connor assisted by both Mrs. R. Wilson and Dr. Pronger of Blue Island has conducted very successfully the Infant Welfare Clinic. This is a great asset to our community and deserves the backing of every mother. This is a piece of service that costs the Village nothing but will bring great benefits.

Miss O'Connor has also conducted a class in nursing for the girls of the community. Five girls finished the course and received Red Cross diplomas. They were Mary, Lea Rose and Margaret Bishop, Eleanor Palmer and Elva Wilson.

May Light County Highways

Electric lighting of all highways is the problem now being considered by the County board of commissioners. The resolution was adopted at a meeting of the board Tuesday of last week. This action follows the resolution of the Amalgamated Improvement Assn., which news was published in the Mercury a few weeks ago.

The resolution, presented by Frank J. Wilson to the commissioners and backed by groups interested in both driving safety and the suppression of crime in the Chicago territory, directed the roads and bridges committee to employ engineers for a lighting survey of Cook county's highway system.

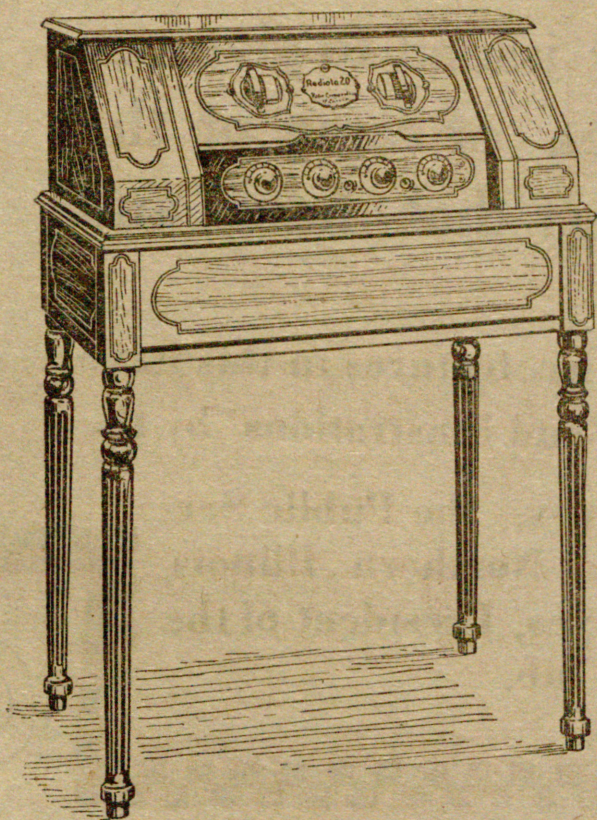

"We have the greatest paved road system of any county in the United States today," Commissioner Wilson pointed out, "but our big network of pavements, in addition to supplying transportation for hundreds of thousands of motorists, serves as an avenue of escape for criminals, as a point of constant danger to night drivers and as an improvement that is only half completed."

"Highway lighting is a matter that is coming to the front in all parts of the country. Many states have improved important stretches of their main roads in this way, and it is time that Cook county tackled the idea in a big way."

Help our Merchants
to help YOU

EVERYBODY will agree that a man succeeds and prospers only when he spends LESS money than he receives in a given period of time.

Let's apply this great economic fact to the situation in this town: Our business men have invested—and continue to invest—their money in stocks of goods brought here to your very door to meet your daily needs.

Through the pages of this paper they advise you of their ability to serve this community. All of us know that they deserve our patronage. And remember, the more you trade with them the more funds they can invest in larger stocks and new lines.

and save yourself money by trading at home

Credit Not Johnson's

When Doctor Johnson's "Rambler" was first published, the sale was decidedly disappointing. In fact the only paper, curious as it may seem in the light of his reputation today, which might be said to have been popular, was No. 37—the only one Doctor Johnson did not write. This paper, says the Market for Exchange, was said to have been written by Samuel Richardson.

Producing Liquid Air

Liquid air is a transparent, limpid and intensely cold liquid, slightly blue in color, and of about the same density as water. It is prepared by subjecting air to great pressure and then cooling it by its own expansion to a temperature below the boiling point of its constituents (nitrogen, 194 degrees centigrade; oxygen, 183 degrees centigrade). Its chief use is as a refrigerant.

WORTH**Goodfellowship Club**

Start Fall Program
The Goodfellowship Club under the leadership of Mr. Harold Ferrin has become one of the most vital organizations in our church and community. It has opened its fall program with a line up of good speakers on community problems also a program of entertainment. This club has proven its worth to the community life as most of the village improvements have been worked out in its meetings. Because of its impartial judgement it has done much good for the community life.

Mr. Macauley Digs Well for Church
An outstanding example of good faith and public spirit has been demonstrated by Mr. L. Macauley. Without a cent of guarantee he volunteered his services and the materials for a well for the church. The only repayment was that the ladies give a supper, let the people give what they desired to the payment of the well. This is setting an example for many to follow.

WORTH CHURCH NEWS
Can Fruit Shower on Mrs. Sanders
The ladies of Worth community gave a fruit shower on Mrs. Paul Sanders Wednesday afternoon.

Thirty-two ladies of the community were present. They presented Mrs. Sanders with twenty-seven pints and twenty-eight quarts of canned fruit of all kinds. Following this they had a social time and refreshments. It was a delightful surprise on the minister's wife.

Halloween Supper and Church night
There will be a Halloween supper and church night at Worth community church, Monday, Oct. 31, at 6:30 p. m. It will be given in honor of Mr. Macauley who made possible a new well for the church. Every one is invited. There will be a social program and speaker of the evening.

Boys Athletic Club
Under the direction of Mr. DeLong and young men of the community will be organized into an athletic club. Mr. Harold Ferrin has offered his old garage as a club house for the boys to use. They hope to get some equipment and fix it up. This will be a great work for the boys and it deserves the support of the community.

Library to be Reopened
The church and community library located in the basement of the church will be remodeled and opened for circulation in a short time. Mrs. F. MacEthyron, Mrs. Lucas, Mrs. Holstrom and Mrs. Harold Ferrin are on the new committee. They hope to get a new consignment of books from the Chicago Library and from some other sources. This can mean a great deal to the community during the winter months when there will be more time for reading.

Sunday Evening Club
Debates and Forum
The Sunday Evening club of the church have started their fall program of debates and open forum. Last Sunday the problem of capital punishment was debated by Mr. Perry Bishop and Miss Margaret Lysen on one side and Mr. Elmer Lysen and Miss Ruth Mitchell on the other. The issues of the day will be discussed in the weeks to come. All are invited.

to take part.
Surprise on Rev. and

Mrs. Paul T. Sanders
On the return of Rev. and Mrs. Sanders to the community a supper was given to them by the church and community. They were presented with \$85.00 in cash from the people of the community. The Ladies Aid gave them a beautiful quilt and the choir gave them a set of beautiful candles and flower dish. Every one turned out for the party and all seemed to enjoy the event.

A shower was given in honor of Mr. and Mrs. Stanley Hanchett at the home of the groom's sister, Mrs. A. Hermanson, Chicago. Those present were the John Leach family and Mrs. Hamilton, the bride's mother, all of Lemont; the Wm. Teason family, the Len Teason family of Worth and many other relatives and friends. The bride received many beautiful gifts.

A surprise fruit shower was given in honor of Mrs. P. T. Sanders Wednesday afternoon at the Worth church. Mrs. Sanders received about 40 quarts of canned fruit. Refreshments of cake, sandwiches and coffee were served by the committee. Several ladies of Worth attended the bazaar given at the Orland M. E. church Thursday night.

Mrs. Conway entertained at her home the W. W. B. Club Thursday night. Four tables played. Those winning prizes are: Mrs. Wilson, Mrs. Luedtke, Mrs. Hildebrand, Mrs. Litke and Mrs. McEathson.

Mrs. Altman entertained friends at her home Wednesday night. Those present were: Mrs. F. Plahm, Mrs. Peterson, Mrs. A. Ferrin, Mrs. W. Little, Mrs. B. Foyle, Mrs. L. Macauley, Mrs. Daniels, Mrs. Luedtke, Mrs. Brebeck, Mrs. Hildebrand, Mrs. Hellenthal, and Mrs. Maes. Bunco featured the evening's pastime. Prizes were won by Mrs. F. Plahm, Mrs. W. Little and Mrs. Maes. After the game a lunch of chicken a la king and coffee was served.

The Edward Teason family are spending their vacation in Holland, Michigan.

The Macauley family and Arthur Cooper of Chicago Ridge motored to Paw Paw, Michigan, Sunday. Henry Leipstreff, our rural mail carrier is on the sick list. Mr. B. Rolf is taking his place.

Helenthal's are remodeling their home. Kauffman's have repainted their house.

The Ladies Aid and The Federation of the Worth Community church are giving a Halloween supper Monday evening October 31st. They plan to make this supper something that will be remembered, as the proceeds of this supper are to defray the expense of the well which was drilled on the church lot recently. We extend an invitation to all to attend this supper and the price of your supper is what you wish to make it. This is the spirit that prevails in Worth.

ORLAND

ORLAND PARK M. E. CHURCH
CHURCH NOTES
Bazaar A Great Success

The annual bazaar of the Ladies Guild was a decided success. Over 250 people were served at the dinner and many bought of the articles on display. Over \$500.00 was taken in.

Ladies of Guild Decorate Church
The Ladies Guild completely redecorated the parsonage. The rooms were papered and the floors and wood work all repainted. The place presented a very excellent appearance for Rev. Sanders the new minister and his bride. It is understood that he plans to fix up the yard and grounds about the parsonage and church.

Rev. Sanders Settled in Parsonage
Rev. Sanders is now settled in the parsonage and will be available to serve the people of the community.

He will be glad to receive visitors and answer any call of need.
FINANCES FOR WELFARE WORK
It will soon be time for church to conduct their annual canvass for funds for the coming year. Many

will be approached on this matter and many will pass it off without giving a cent, others will give or promise to give five, ten, twenty or fifty dollars or more for the entire year. Many will say they must pay, because they come around begging for the church.

Did you ever stop to think what this means. If every one in the community acted the same way would it be possible to have a church in the community? What would it mean to have a community without a church, without a Sunday school for the children without a moral influence of a church and pastor. It takes money to keep a church a-going. A minister cannot live on any less than you can, it takes money for the upkeep of the church.

Did you ever think what it means when you give five dollars to the church? It means that you are giving less than a cent and a half a day or about ten cents a week. You would be ashamed to give so little to anything else. You may spend fifty cents on a show that does no good but think of what it would mean if you would give 50 cents a week to the Lord's work. It would mean \$26 a year. If every one who could easily afford it would give \$1.00 a week think of the program that the church could put on.

Before you decide to give five, ten, twenty or thirty dollars to the work of the church think of what you are doing and compare that with the way you spend the rest of your money.

Rev. W. C. Greve and family left Monday morning on a motor trip to Milwaukee.

Father Wm. Gorey, Mayor W. R. Schussler and several others attended a good roads meeting and banquet in Joliet last Friday.

The stock in the late A. & G. store in the Zerbs building was removed the past week and the store room is for rent again.

Davidson & Doctor are busily engaged in building a \$50,000 bridge at La Grange.

Clarence E. Beagley, our well known local electrical contractor is receiving many compliments on his beautiful new truck. This equipment is a big boost for Mr. Beagley's business.

Howard Hewson has signed up a contract for the Ford agency at Orland Park.

MARLEY

The annual bazaar and supper of the Woman's Missionary society of the Marley Community church will be held in the church parlors of the church, Friday afternoon and evening, November 4. Various booths containing articles suitable for Christmas gifts will be on display.

Sale of goods will commence at 2:30. Supper will be served during the evening. Everybody welcome.

A box social will be held at the Marley school house, Friday evening, October 28. The public is invited to attend. Ladies to bring a box packed with lunch for two.

The Parcel Post committee of the Marley church bazaar, are asking for ten, five or ten cent parcels from each member and would be pleased to receive donations from any one for this booth.

The Utility committee are asking those who are working up goods handed out by the society to please try to hand them in before the day of the sale, so they can be priced and arranged for the bazaar. They would also be pleased to have the donations turned in before that day if possible. Kindly hand articles for the committee or chairman, Minnie Handorf.

Mr. and Mrs. Charles Lahmann and Mr. and Mrs. William Lahmann visited at the home of Mr. and Mrs. Paul Hampel at Worth Sunday. Mr. and Mrs. Hampel will depart for their winter home in Manatee, Florida this week.

Guests at the home of Mr. and Mrs. Louis F. Sass Sunday were: Mr. and Mrs. Francis Lee and daughter Margery of Fernwood and Mr. and Mrs. George Leversee of Chicago Lawn.

Mrs. Maggie Haley visited at the home of her sister, Mrs. Julia Wheeler in Aurora this week.

Louis Tilley and Oscar Bump visited friends near Worth Sunday. Mrs. Lucy Marshall and brother William C. Fry enjoyed an automobile trip along the Fox river to Elgin recently.

Milk Gives Most Food Value At Least Cost

Milk gives more food value for less cost than any other food known to man, according to Herbert C. Hooks, secretary of the Evaporated Milk association.

"Dietitians are unanimous in advocating the use of milk by men, women and children," said Mr. Hooks. "Milk and evaporated milk supply some of all the materials necessary for the growth and maintenance of the body; they furnish energy for work, play and warmth."

"Milk helps repair the wear and tear of the body. It is a good meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Herman Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat ad infinitum."

"Due to the efforts of health officials to get across to the public the message of milk, its general use in the United States has advanced tremendously in the last decade. This is especially true of evaporated milk for reasons of its convenience and economy. Housewives know there is no fear of obtaining contaminated evaporated milk, because it is not only the best grade of market milk rendered double-ly by dehydrating, but it is sterilized as well."

H. C. Hooks.

for the growth and maintenance of the body; they furnish energy for work, play and warmth.

"Milk helps repair the wear and tear of the body. It is a good meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Herman Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat ad infinitum."

CHAPTER XI—Continued

Halfway across, the dusk from Akimiski moved out to meet the travelers, soon to look upon, in the berths of the schooner, death, in all horror of plague-stricken men; or to meet a treachery, as Guthrie believed, too vile for the uses of a fighting man like Laughing McDonald. But the canny half-breed would not be convinced, and the knife, shifted to his capote sash, and the uncased rifle barrel thrusting from his robe, were sinister witnesses to his distrust of the Cree.

The barrens of the island purpled, then fused with the dusk. Stars glittered above the moving teams. At last in the starlight, the black masses of the hills flanking Seal cove loomed ahead. The Indian stopped his dogs. "Eet ees ovaire dere." He pointed to the invisible shore.

Ordering the disarmed Cree to remain with his dogs, Etienne called Garth for a whispered council of war. "De schooner ees not far. We stop an' tie up de husky. Den you an' Shot go one way an' I tak' dees feller wid de gun een hees back an' we circle roun' de boat."

"All right! If either sees or hears anything, two long whistles. Will they hear our dogs if they yelp?"

"No, eet ees too far." Shot, trained to silence, would be invaluable in a fight, but the huskies' yelping would betray them, so they were lashed to the sleds.

"Eet we don' see nodin', I mak' dis feller holler de ship. Den we wait. I tell heem he is de first een de boat, wid de gun een hees ribs. He ver' scare—something bad here," warned Etienne.

"He's afraid of the devils," suggested Garth, uncasing his rifle, and regretting that his army automatic hung neglected in its holster on the rack at Elkwan. This stalk of the ship had much of the color of a trench raid—a fight in the dark, if Etienne was right—and he missed the feel of his pistol on his belt, the drag on the shoulder-strap of a bag of Mills bombs.

As they separated, Etienne gripped Garth's hand. "I meet you at de boat. Keep behin' de ice wen I mak' heem holler, eet dey shoot."

The idea of stalking dead men was grotesque, but as Garth and Shot made their way slowly toward the shore, for the stars were dim, the possibility that Etienne's suspicions were not unfounded grew in the mind of Guthrie. Suppose the Indian had seen a dead man. There might have been a fight aboard while the rest were temporarily ashore after fur. True, McDonald might be dead, but with the leader gone, Breault, desperate, sick possibly, perhaps insane, might have evolved this scheme to lure some of the Kapiskau people across the ice. For the Indian was bound for Kapiskau when they met him.

That the ruse was McDonald's, Guthrie put aside, but strange things had happened before among a ship's company wintering in the ice, and who could guess what had fallen out on The Ghost?

When, in the faint light of the stars he made out the ice-sheathed poles of the schooner, Garth patted his excited dog. "Stand to, Shot!"

The alredead stiffened, sniffing the wind, then side by side, man and dog cautiously made their approach. From behind a pressure ridge, a hundred yards from the frozen-in craft drifted with snow to her low rails, Guthrie stopped. There, under the dim stars, silent, sinister, lay the ship. Was it the sepulcher of luckless dead, or—

Two whistles from the direction of the ship started Guthrie swiftly over the ice behind his silent dog. Circling the stern, he found behind a mound Etienne and the shaking Cree.

"What is it?" "I hear some soun' on dat boat." "Eet ees de spirit," whispered the Cree.

"We go up an' leesten," said Etienne, prodding the reluctant Indian forward.

Standing with rifles leveled on the plank-sheathed deck-house, they waited. Presently to the straining ears of the men came a moaning as of a creature in agony, to culminate in a crescendo of groans.

The two men peered questioningly into each other's faces. At their side the alredead trembled in a frenzy of excitement. "Make him call to them," muttered Guthrie, with a nod at the panic-stricken Cree.

The steel muzzle of Savanne's rifle found the Indian's ribs. In a voice shattered by terror, the Cree called: "Kequay! 'Allo!" But no answer from within broke the heavy silence. They waited. Again low moaning drifted from the deck-house.

and calling Shot, leaped the rail, followed by Etienne. A door, behind the sheathing, opened to his hand, and with the dog in front, they made their way down to the pitlike blackness of the cabin. The odor of spilled whisky, food—and the stench of corpses struck them like a blow in the face. Striking a match, Etienne lit the stub of a candle he took from his pocket. In its flickering light the two gazed in horror at the chaos around them. On the table, the floor, whisky bottles, empty, half full, lay in a litter of meat and biscuit tins, dishes and scattered food. Sitting, jammed grotesquely between boxes in a corner, a rigid hand gripping a glass, the candle lit the staring eyes and gaping mouth of a dead man.

"Black Breault!" muttered Guthrie. "Died drunk! But that groan! Where are the rest?"

Turning, nauseated from the air and the loathsome spectacle, they found a stateroom. In two berths lay the dead bodies of the bearded mate Guthrie had met on the beach, and a sailor. Then a muttered groan and a curse led them to the adjoining room. Guthrie stood in the low door, holding the candle above his head.

In a bunk a gigantic figure lay in a sleeping bag. Guthrie bent forward, thrusting his arm with the light into the room. The heavy breathing of the bulk in the berth pulsed through the small room.

"McDonald!" Etienne crowded beside his chief, curious to see the man whose fame had swept James Bay. The face was turned from the door and Guthrie entered the room to stumble over a bottle which rolled away, spilling its contents. Then he held a light over the mutilated face.

As the candle lit the russet hair and unseeing eyes, flaming with fever above the shattered face with its red beard, Garth Guthrie stared motionless. Slowly his jaw dropped. As if in the spell of some strange fascination, the grimacing face in the candle light held Guthrie's unwavering eyes. Bewilderment, profound, shifted slowly to amazement—to recognition.

"Craig Galbraith!" he gasped. Then swiftly turning back the robes, exposed at the base of the corded neck a jagged scar.

"Craig Galbraith!—Laughing McDonald! God!—what irony!" Turning to the perplexed Etienne, Guthrie rapidly explained as he felt for the pulse in a huge wrist.

"Etienne, you and I have work ahead! This is 'flu' or pneumonia. He needs some nourishment—may have starved for days. The bag has saved him—kept him warm with that fever."

"But you nurse heem—dis McDonald! Ha! Ha!" demanded the surprised half-breed.

"Nurse him!" Garth laughed rawly. "Why, this man took me on his back through hell itself—brought me through a barrage with one of his arms broken and a shot in the chest. He was my friend—my pal, understand?—saved my life! We were brothers—in France! Light the galley lamp and heat some broth—soup, quick!"

"Hees name not McDonald?" asked the bewildered Etienne, dazed by the swift reversal of the situation.

"No! I never suspected—never dreamed who McDonald was. He was shot in the face while I was in the hospital. I didn't know how bad it was—never saw him again."

With a quick glance of admiration at the gigantic frame of the man deep in delirium, Etienne went to find the galley and start a fire.

Guthrie found and lit a lamp; then poured some whisky in a glass and propping up the head of the unconscious man, got it down his throat. A rapid inspection of the boat discovered a fourth corpse. The Cree known to be with the schooner, and another man, had evidently deserted the dying. The absence of rash on the bodies and faces did away with the possibility of measles or smallpox, it was doubtless influenza, contracted from an Indian or Eskimo, from whom had been received at Albany from Moose that influenza was again loose on the bay.

Finding the Cree waiting out on the ice, Garth sent him for the dog-tents and leaving the efficient Etienne watching a kettle of canned soup and a coffee pot on an oil stove, returned to Captain Craig Galbraith, alias McDonald! Ha! Ha!

Lighting a pipe to combat the odor of spilled whisky, Garth sat down on a stool to consider his problem.

Once after his return home he had heard from the man who had brought him unconscious through that hail of gas and lead and steel, and whom he had never seen since the day Galbraith left the same hospital to rejoin his command. In his letter from Hal-

fax, Craig had refused an invitation to visit Montreal, pleading business, but, unknown to Garth, the giant at whom the women of France were wont to turn admiring eyes, had come home wearing the grin of a gargoyle. Then, like a rifle shot, struck home the realization that the man wanted in Halifax for killing his wife's lover was the man in the bunk. He pictured the agony of him, once called Handsome Galbraith, bringing that twisted grimace back to the wife he had loved—the blind rage, born of despair and shame, that heated his blood on finding her faithless as a woman, and as a hero's wife, for the broad chest of Craig Galbraith, famous in the Canadian corps for his trench raids, wore the bronze badge of the elect—the Victoria cross.

If he died, it did not matter; but if he lived? If he lived, he was a hunted man. Cameron would send a party to Seal cove on hearing from Guthrie of his discovery. The ship and fur would be held for government action. In the meantime what of the man in delirium?

Etienne entered with soup, which Galbraith mechanically swallowed. "Is the Cree back with the dogs, or did he leave us?"

"No, he come back. I tole heem I would follow heem an' cut hees throat if he run away," said Savanne dryly. "Etienne, we can't stay here. We'll pick up this 'flu' or something worse. The ship is a morgue. And I won't leave the man who wouldn't leave me." For a space Guthrie puffed

furiously at his pipe. Suddenly he slapped his knee. "I've got it! Listen! His heart is strong, and the fever, as near as I can tell, is not as bad as it might be. It's fifty miles to Elkwan. With the Cree's dogs you can make it by daylight. Well wrapped up and bound, so he can't roll out or hurt himself, he'll make it. It isn't cold, and cold air is better than this stinking ship."

Etienne listened as if he thought Guthrie had suddenly gone mad. "But you? where you go?" he broke in.

Guthrie smiled. "I'm going to take our dogs to Albany."

"To Albanee?" "Yes! It's my duty to report this to Cameron at once."

"De Cree can go." "No, you'll need his help. I'll pay him well."

"But," Etienne sensed that something lay behind it all, "we tak' dis man to Elkwan an' de police come—den wat?" Etienne also had guessed.

"At Albany," smiled Guthrie. "I'll tell Cameron that you shot yourself accidentally—bad wound. And I am going to bring Miss Quarrier up the coast tomorrow, to nurse you. She knows all about wounds—and I think—she'll come," added Guthrie quietly.

"By gar!" The half-breed stared at his chief in unqualified admiration.

"It's his only chance for life. Here he would die. The place is infested with germs—ought to be burned. You understand? You start as soon as you can, I'm on my way now. I'll be in Elkwan tomorrow night—if she'll come with her medicine kit. And I think she will—for she's a soldier, God bless her!"

After forcing more soup down the throat of the sick man, he was given a stiff drink of whisky, bundled in fur, bound with strips of blanket, and with great difficulty carried to the sled. Fortunately for Guthrie's plan, the delirium had not taken a violent form, for the enormous strength of Galbraith would have baffled them.

With a grip of the hand Guthrie bade his staunch head man good-by, and whistling to Shot, started with his

tired team for Albany. Already that day the dogs had done sixty miles and the forty miles before them over the rough sea-ice, even with the light sled, would, if pushed, bring them into Albany, five sore-footed, stiff-legged cripples. So it was not until the sky grayed with the dawn that Guthrie drove up to the tradehouse at Fort Albany, and feeding his tired team, put them in an empty shack where they might sleep through the morning, undisturbed by the hectoring of the post dogs.

Later, walking in on the Camerons at their breakfast, he told of the stalking of the schooner of the dead.

"Well, that's the wildest tale I have heard in forty years on this coast," ejaculated the factor, while his wife and children sat with averted faces. "Not a soul alive on the ship?"

"Not a soul alive," repeated Garth. "Flu" and probably the whisky they carried didn't help any. The schooner reeked with it. Poor devils, they must have stayed drunk to ease their misery."

"And the fur, two years' trade, did you see it?"

"No, but Etienne said there was a lot of it on board. Then, somehow, in casing his rifle, he shot himself."

"Shot himself?"

"Yes, in the hip. That's why I'm here." Guthrie took the bit in his teeth as his gray eyes squarely met Cameron's. "I'm going to ask Miss Quarrier to come to Elkwan with her medicine kit. She knows wounds—I'm afraid of blood poisoning."

"But, why didn't you put him on the sled and bring him here. She can take care of him better at Albany, and then—"

Guthrie shook his head. "He wouldn't come, Cameron. He thinks he's going to die, and wanted to be with his wife and children."

"Oh, but how can you ask that girl to go to Elkwan? She's needed here. Swan'll raise a devil of a row—has already, over your seeing her."

In the narrowing eyes of Guthrie lurked a glint which Cameron recognized. He had seen it before in the look of men, indomitable, desperate. It startled him, made him wonder—about the affair between Joan Quarrier and the factor of Elkwan.

"Of course, we don't want anything to happen to Etienne," he temporized, "but why you didn't bring him here is beyond me."

"I've already told you why, Cameron. The gray eyes of the speaker were black, as they bored coldly into those of the kindly Scotsman. Ill at ease, Mrs. Cameron went to the kitchen to digest the startling announcement.

"Yes, I know they always want their family around when they're scared. Well, if she'll go, it's her business. It'll raise a rumpus, though, and I hate to have her—hurt."

Guthrie was on his feet, scowling down at the other. "One minute! Let's go slow here! You're my superior, and I had hoped, my friend, but you're on dangerous ground, Cameron. What do you mean by—hurt?"

"There, there, now, my lad! Keep cool," expostulated the older man. "I'm your friend and I'm proud to be. Now you've brought it up, I've got to talk to the shoulder. You don't realize what that skunk of a Quarrier tattled about you—"

"Oh, I know all about that—that sick child who died at Elkwan—Joan was there. Hasn't she told you?"

"Why, of course! But the rest, here, and at Moose—you know them. Swan has made a row because she wasn't sent to the mission, to die."

"What of it?" snapped Guthrie. "He says you kept her there against her will."

"Nonsense! She couldn't walk a hundred yards without stopping to rest. She refused to come down the coast to the mission—just faded away."

"Mrs. Cameron and I understand, Guthrie. Etienne and Joan told us. It's this white-livered missionary who has made the trouble and if Joan goes with you to take care of Etienne, he'll not spare her either—he'll bust with righteous horror—And it'll hurt Joan."

"Will you call your wife?" asked Guthrie, in a tone brittle like the shattering of ice, the muscles of his jaw and temples working under the skin.

"Why, yes!" replied the factor. "Mary! We want to speak to you."

"Mrs. Cameron," said Garth, quietly "your husband tells me that it will seriously hurt Joan Quarrier's reputation in missionary circles, if she goes to take care of Etienne's wound."

"I'm afraid it will cause a lot of talk here and at Moose," regretfully agreed the factor's wife. "You know what they are."

"No, I don't know what they are—except this, I know that Mr. Swan must have a foul mind. Of course, he has no head—there's no room under his hat for one."

"He'll surely forbid her to go with you, Major Guthrie."

"Suppose she goes anyway?" "I don't know what to say."

Guthrie smiled. "Well, would you feel better about it, if I told you I loved her, and have already tried to ask her to marry me—will ask her every day she's at Elkwan?"

The face of the startled and embarrassed Mary Cameron flushed with delight. "Oh, Major Guthrie! I'm so glad—so glad!"

"H—ll! take her up today! I wasn't sure you were serious, my boy, and we think a lot of her," gruffly exclaimed the factor.

Her eyes misted with tears she could not control, the factor's wife grasped the hand of Guthrie with both of hers. "I don't know—she never told me!" she cried, "but I've thought somehow that she thinks a lot of you. I wish you luck!"

So peace was made at Cameron's. (TO BE CONTINUED.)

"Let's Go Slow Here!"

Find New Evidences of Coal Formation

Evidence that coal was formed at the bottoms of ancient lakes, and not in vast swamps or bogs as commonly supposed, is advanced by Prof. E. C. Jeffrey of Harvard university in an article in Science. Professor Jeffrey's studies were conducted on coals from geological formations of tertiary age, which is much more recent than the source of most of the coal in this country, but which supplies remains of plants more like those growing today and hence more significant to the botanist as far as their habits are concerned. Earlier studies of similar coals had disclosed wood structures which were taken to be of cypresses, and since cypresses are swamp trees this was taken as evidence for the

classical theory of coal formation. Professor Jeffrey's investigations, however, have shown that these supposed cypress-like woods were really from redwoods and similar trees that normally grow on well-drained upland soils and never in swamps. His conclusion, therefore, is that these coal beds are the remains of great masses of water-logged vegetation washed down from the hills by rivers and deposited in the bottoms of huge lakes.

Forced to Divide Diamond

Until the discovery of the Cullinan diamond the Excelsior held first place for size, but when after twelve years no buyer was found for it, it was divided.

Put Leading Citizens'

Faces on Monument

By a woman artist's prank, the faces of prominent living citizens of Helsingborg, Sweden, have been carved as astronomical figures on a monument unveiled there to the memory of the Seventeenth century astronomer, Tycho Brahe. When, at the command of the Swedish crown prince, the celestial globe, surmounting the fountain, was unveiled, the spectators recognized the architect, G. W. Widmark, as the Bear Driver; the editor of the local newspaper as Perseus; the chairman of the board of aldermen as the Wagoner, while the sculptor of the figures, Miss Astrid M. Angesen, had carved a portrait of herself as the Virgin. Other notables of the town have been immortalized as the Centaur, Hercules, etc. Even the city physician, C. B. Hallengren, who had most vigorously opposed the erection of the monument, has his face among the stars, but instead of the expected caricature, the likeness is good.

Poetic Idea Evolved

in Small Boy's Mind

Richard Le Gallienne, poet, was talking about poets at a reception: "Poets are children," he said. "I have known all the great poets of our time, and they were all simple-minded, unaffected, childlike. Yes, poets are children, and children are poets. "One summer I visited an encampment of little country weekers—slum children who were enjoying a week-end holiday in the country. It was evening, the new moon was setting, and a small country weeker said as he gazed at the western sky: "I wonder what becomes of all the old moons?"

"I guess," said another urchin, who stood beside him, "I guess they cut 'em up for stars, Bill."

Make Him Happy

A fire which destroyed the house and garden of an aged cripple at Lead, South Dakota, brought into the life of the old man a lot of happiness. Boy scouts of Troop No. 22, who lived in the vicinity, adopted the old man and nicknamed him "Dad." They aided him in rebuilding his home, furnished him with food and clothing and cut him enough wood to keep him comfortable during the cold spells. Scouts from the troop were detailed to spend one night a week with the old man and the efforts of the troop have given him a new hold on life and happiness.

Odd Cure for Deafness

Joe Duree of Des Moines, Iowa, completely deaf, dropped 9,000 feet and was partly cured, but his dropping was done in an airplane and it was a treatment prescribed by several doctors. Duree's hearing was destroyed ten years ago, when he contracted influenza while serving in the army. Doctors advised this remedy in the hope that his eardrums would be jolted into sudden activity by a sudden change of atmospheric pressure. Duree plans another swoop to improve his hearing further.

Most Costly "Mike"

"Royal Mike" is the name given by the British public to the special microphone used by King George of England when he broadcasts. This instrument, reserved for the royal family, is covered with silver wire and bears, in gold, the familiar insignia of the lion and unicorn. It is said to be the most valuable "mike" in the world from a monetary standpoint.

Enlightened

Owner (politely)—Pardon me, but are you aware that this water is preserved?

Unsuccessful Angler—Oh, that what it is? I thought there must be something the matter with it—Passing Show.

"Fair" Marriage Record

All Cupid's records for fair time at Glasgow, Scotland, were broken this year. Twenty-nine couples were wedded before the sheriff on Fair Friday, the popular day for nuptials. The number is one more than a year ago. Nineteen couples were married the previous day.

What Every Child Learns

Betty—You mustn't tell a lie. Jane—Why not?

Betty—Because it's like smoking; it isn't right to do until you are grown up.

When a wise man bets on the races he lets his wife hold the stakes.

Listen, Darkling—

Suitor—Tommy, does a young man call here in the evening to see your sister?

Tommy—Not exactly to see her, because there's no light in the room when he's there.—Boston Post.

His Handicap

She—Well, have you decided what we are going to do this evening?

He—Let's think hard. "No; let's do something that you can do, too."—Boston Post.

Not a Cure!

Johnny—How long after I've taken the anesthetic will I know anything?

Doctor—Now, my boy, do not expect too much from an anesthetic.

Butter Color Depends on YOU

Don't blame the feed or the condition of your stock if market men grade you low and customers complain on account of the color of your butter. You can keep your butter always that golden June color which brings top prices by using Dandelion Butter Color. It's purely vegetable and meets all State and National Pure Food Laws—used by all large creameries for years. It's harmless, tasteless and doesn't color buttermilk. Large bottles, 35c at all drug and grocery stores. Write for FREE SAMPLE BOTTLE Wells & Richardson Co., Inc. Burlington, Vermont

FOR SALE—Electric washer with 2 tubs. Inquire in evenings of E. J. Woods, Mokena, Ill.

We're Literary All Right

The highbrow that argues that we are not a literary people any more should have seen that fat girl lying right smack on her tummy on a bench in the Pennsylvania station the other night reading a vivid magazine. Guess he'd take back them cruel words!—Wilmington News-Journal.

Andrew Jackson's Politics

Andrew Jackson is popularly supposed to have started the modern Democratic party. It was to a large extent the successor of the Jeffersonians. But Old Hickory himself did not apply the name "Democratic" to his followers. During his Presidency and after his retirement to the Hermitage, in all his correspondence he called himself a Republican and spoke of his party as the Republican party.—Pathfinder Magazine.

Life's Law

Life yields her rewards to those who work for them. If you plant cabbages don't expect to pick roses, for the laws of life are exact, and never deviate the slightest bit. Your life will shape itself according to the mental pattern which you shaped for it.

TINLEY PARK

The Mount Greenwood Orioles downed Tinley Park Sunday afternoon 12 to 6 in a close foot ball game at Mount Greenwood. It was not a hidden ball trick, but a hidden player dashing wildly through a crowd of excited fans on the playing field that lost the game for Tinley or prevented at least a tie score. This dash with wonderful interference by Mount Greenwood fans enabled the opposing team to score their second touch down.

Wyman, fullback, scored Tinley's lone score in the final quarter on a terrific line plunge.

Tinley's grand opportunity to score earlier failed when Swede Manson caught a pass, ran same 20 yards and with a clear field ahead, stopped dead in his tracks to turn around to see if any tacklers were near him.

The football team is going to buy "Swede" a copy of "Old Siwash" to let him know how his descendants played football.

Sunday Tinley Park will return to the home gridiron again meeting the strong Palos Park team. The game will start at 2:30 sharp. A week from Sunday Mount Greenwood plays a return game here.

Rudolph Detwiler saw the Northwestern-Illinois football game Saturday afternoon at Evanston in the new Dyche Stadium.

FRANKFORT

Milton Schoemaker who has been ill in the Silver Cross hospital for some time following an accident on the Lincoln Highway in which he suffered a broken leg when he was hit by an auto, was removed to the home of Ferdinand Bobzin and is now able to walk around with a cane. He had been working as hired man for Henry Bruggeman before the accident.

Mrs. E. H. Koerner left Tuesday for her home in Los Angeles, Cal., after spending the past two months here with her parents, Mr. and Mrs. Conrad Sippel and sister, Mrs. C. Fink and other relatives and friends. Dr. and Mrs. W. Thomas and daughter Eloise of Manteno, Ill., spent Sunday at the John Clark home.

George Letts and Mr. and Mrs. Pfaff, Jr., had as their guests from Friday till Tuesday Mr. and Mrs. Bert Letts and Mr. and Mrs. Wm. Silbers all of Webster City, Iowa. Mr. Letts and Mrs. Silbers are a brother and sister of George Letts.

The Frankfort M. E. Ladies A. will have a sale and supper at their church parlors November 4th.

The third annual convention of the Will County Royal Neighbors

was held at the Frankfort hall the afternoon and evening of Wednesday, October 26. Over 200 Royal Neighbors attended. The next convention will be held at Manhattan next October.

Mrs. Nekrauer, son Harry and Mrs. Cosgrove expect to leave on November 3rd for Mt. Dora, Florida to spend the winter.

MOKENA

The annual bazaar and supper at the St. John Evangelical church on Wednesday was one of the best the Ladies Aid of that church have held in years. Everything sold well and 150 guests were served at supper.

M. E. CHURCH NOTES

Glen T. Beaty, Pastor. The pastor has been confined to his bed most of the time for the past week with Neo-Pneumonia, and was forced to be absent from his pulpit last Sunday. However, a letter from him states that he is much improved and gaining strength rapidly. He expects to fill the pulpit next Sunday and will preach on the subject "Is There Romance in Life for the 20th Century Person?"

The annual bazaar and supper of the Ladies Aid of the M. E. church will be held in the St. John church parlors Nov. 18th.

The Mokena Improvement Association will meet next Tuesday evening in the school house.

A company of relatives and friends from Joliet called upon Mr. and Mrs. Wm. Semmler last Friday evening and helped them celebrate their 13th wedding anniversary. Bunco was played and refreshments were served.

Relatives and friends surprised Mr. and Mrs. John Wannemacher at their home last Thursday evening and reminded them of their 44th wedding anniversary. Games were played, among them being, a mock wedding which created much merriment. Refreshments were served. The honored couple was presented with a radio.

New Rock Island Track and Signal Improvements Keep Pace With Increased Freight and Suburban Traffic

New Signals Being Installed Between B. I. and Joliet

The Chicago, Rock Island & Pacific Company is making some extensive improvements to its track and signal facilities between Joliet and Blue Island to keep pace with the growing traffic in this zone. New yards are being built at Joliet, east of the E. J. & E. railway crossing, and the westbound main line between Joliet and Blue Island is being signalled so it can be operated as a single track—that is, both eastward and westward trains can use this track. An interlocking plant is being installed at Mokena, for the purpose of crossing trains back and forth between the eastward and westward tracks without stopping.

To obtain the maximum benefits from these improvements, the latest practice of directing train movements by signal indications instead of by written train orders will be used. The automatic train control apparatus, which has been in service since 1923, will be connected into the new signalling system.

The Rock Island has been operating an arrangement similar to this in the Chicago Terminal Division zone for about two years with such success that the installation between Joliet and Blue Island, also a ten mile installation on a congested portion of the railroad in Kansas, have been authorized. The installation through Mokena is of particular interest not only to the Rock Island, but to the railroad fraternity generally, as it comprises some special engineering kinks originated by the railroad's engineering forces.

When completed, the new facilities will be of particular benefit to freight traffic. On account of the long heavy grade eastbound from Joliet to Mokena, the average speed of freight trains is so reduced that passenger trains overtake them on this grade. To avoid delays to the fleet of eastward passenger trains during the early morning hours, freight trains regularly accumulate at Joliet, causing congestion at that point, as well as delay in reaching the Chicago terminal.

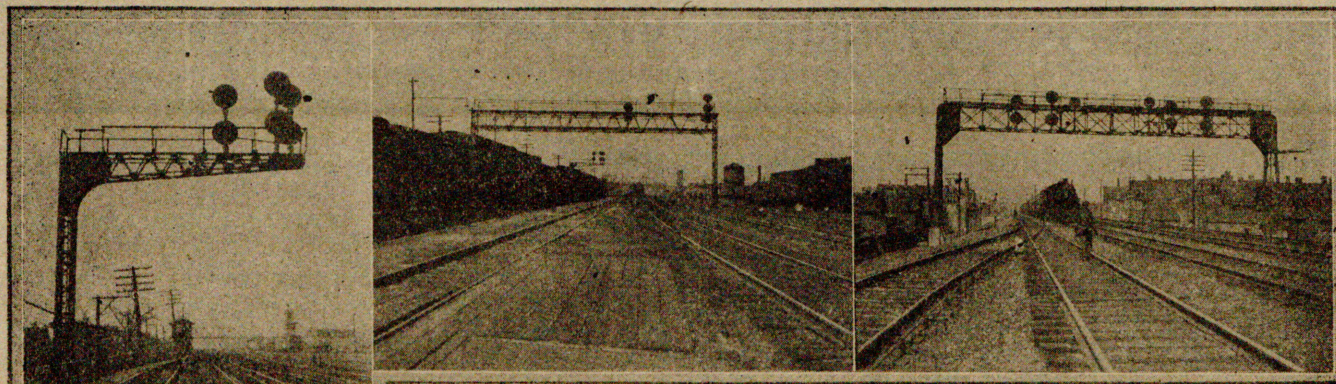

During this particular period of the day there are no westward passenger trains and relatively few westward freight trains. Under the new scheme, eastward freight trains will be diverted at the Joliet interlocking plant over to the westward main and use that track into Mokena or to Blue Island, depending upon the location of other eastward and westward trains.

The leaving ends of both eastward and westward passing track switches at Mokena will be equipped with the latest type spring switches specially developed for steam railroad service. With these spring switches, trains which have entered these passing tracks to permit other trains to go around them, can follow the main line train and proceed without stopping to throw the switch, thus saving from three to five minutes for each move of this character.

The location of the new yards east of the E. J. & E. crossing, will materially relieve congestion at Joliet. Heretofore, a considerable portion of the work required by freight trains at Joliet was handled east of the crossing; then, in frequent instances, when they were ready to proceed into Chicago, the E. J. & E. freight traffic would further delay them. Under the new arrangement, a greater portion of this freight train work will be handled east of the E. J. & E. crossing; then, when it is completed, the train can proceed into Chicago without interference from the heavy traffic on the E. J. & E. railway.

The signaling between Joliet and Blue Island will be completed and placed in service about the first of November.

As explained earlier, the Rock Island has had this special signaling in service on the Chicago Terminal for some two years, and some pictures are reproduced herewith to show the scope of that work.

The above illustrations show the new type of signals being installed at various points along the Rock Island Lines and which add to this rail-

road's high standard of efficiency. The half-bridge like signals show in the accompanying pictures are the type which have been installed between Blue Island and Joliet. Signals of this type are in use in the Chicago Terminal and have given excellent satisfaction. The Rock Island is keeping pace with their ever increasing suburban and freight traffic. The accompanying article has been especially prepared for the News-Bulletin by Signal Engineer, Mr. Leroy Wyant.

BEAUTIFYING STATION LAWNS

Flowers, trees and a well kept lawn, will beautify the most humble shack and make it an enticing place. There was a time when a railroad station was nothing more than a little brick-colored structure surrounded by cinders, and the last place in the world one would look for anything of an artistic nature.

Those times have changed, and especially is this change noticeable on the Rock Island. Today, the traveler who journeys through the fourteen states served by the Rock

Island Lines, sees the traditional little red depot replaced by attractive, modern structures, surrounded by equally attractive and well-kept grounds. Each day countless passengers are impressed with the floral beauty of these station grounds.

Tendency Is System Wide

All over the Rock Island system, this tendency to beautify the station grounds is evident. Even some of the smaller, and less important stations stand out like an oasis in the desert with their pretty flowers

and velvet-like lawns. The station grounds in many instances assume the appearance of private yards and gardens, and give evidence of careful planning and considerable landscape gardening.

When the train pulls into the station at Moline, Ill., passengers can't help but be impressed with the beauty of the grounds. The spacious, well-kept lawn, the beautiful shade trees and the neatly arranged shrubbery, invites one to linger. The station grounds at Moline would be

a "beauty spot" anywhere.

Fairbury Lawn Real Show Place

The station lawn at Fairbury, Nebr., is a real show place. This large lawn is artistically punctuated with attractive flower beds, and is so arranged that flowers are in bloom from early Spring till late in the Fall. Many people of Fairbury get ideas for their own private gardens from the Rock Island lawn. Each year the flower beds are arranged differently, and the variety of lay-out and flowers, make the

lawn of continual interest to the people of Fairbury, as well as a thing of unusual beauty to the traveling public.

At Liberal, Kans., one is immediately impressed by the attractive station building and the inviting lawn. The station, which is of Spanish design, and the lawn, which is liberally dotted with flowers, shrubbery and young trees, give the place the atmosphere of a private home.

Iowa Has Many Pretty Lawns

Out in Iowa where "the tall corn grows," many beautiful station lawns greet the eyes of the passengers as they wend their way to and from the Rockies and intermediate points. At Grinnell, Iowa City, and many other places, neat lawns and pretty flowers attract the eye.

Down at El Reno, Okla., the park in the rear of the station, has long been a source of pride, not only to Rock Island people, but to the citizens as well. Here one finds a carefully plotted lawn, with petunia and gladioli beds in profusion.

Practically all of the suburban stations in Chicago are beautiful with lawns and flowers and trees. Bird baths have been put in on many of the lawns.

Arkansas also contributes its share of beautiful lawns. Haxen, Ark., has one of the outstanding station parks. It is located across the tracks from the station and is looked upon as a sort of city park. An attractive band stand has been erected at one end of the lawn and is used for band concerts. This lawn is a large one, dotted with large beds of gladioli.

On passing through Lonoke, Ark., passengers will get a glimpse of a "beauty spot" across from the station. Here one sees a neat lawn completely surrounded by gladioli. And at Carlisle, Ark., there is a very attractive lawn profusely set with flowers and shrubbery.

They Attract Business

The "beauty spots" mentioned above and the many others to be found on the line they represent pride and much effort on the part of those who are responsible for them. In many cases the agent himself keeps the lawn in order, while in others, section men or regular ground keepers do the work. But every employ who helps to make or maintain one of these "beauty spots" is deserving of much credit. He is helping to make his railroad more attractive to the public, and by doing this, he is attracting more business to the railroad. Every normal person is bound to react to beauty. There can be no doubt that these "beauty spots" will help to popularize the Rock Island.

—Rock Island Magazine Oct. 1927

YOUR GOSPEL

You are writing a gospel,
A chapter each day,
By deeds that you do,
By words that you say.

The News-Bulletin

News of the Week In News-Bulletin Territory

Woman Speeder Causes Serious Auto Accident

Immanuel Marti of Mokena, figured in a serious auto accident while crossing the Lincoln Highway at the four corners north of Frankfort last Friday morning about 9:30 o'clock.

Just before reaching the corner on route 64 Mr. Marti looked both ways on Lincoln Highway but could not see a car in sight. Just as he was about over the highway he saw a car coming from the west at a terrific rate of speed and heading directly toward him. He could not turn out of the way in time to avoid the crash.

Mr. Marti was driving a Ford touring car and the oncoming car struck his car between the front door and the motor-hood. Mr. Marti was hurled out of the car and his little son Robert who was with him was hurled 15 feet but escaped injury. Mr. Marti was badly cut and bruised about the head. His car was thrown almost 40 feet from the point where the collision took place.

The car which struck Mr. Marti was a Star Coupe driven by a woman giving her name as Mrs. Seeding of Cedar Rapids, Iowa. She had an eleven year old girl and 2 bull dogs with her.

The child was hurled thru the windshield and suffered a deep gash on her throat from broken glass.

The cut just missed the jugular vein. She was taken to the office of Dr. W. V. Hedges in Frankfort and then to the Silver Cross hospital, Joliet.

Both cars were smashed beyond repair. It is thought the woman driver was speeding and lost her head when she saw the car ahead of her. If she had turned her car toward the north she would have been able to run around Mr. Marti's car, but instead she swerved her car directly into Mr. Marti's car. She escaped injury.

Accident Taboos Playground Slides

Play ground equipment and supervision of same was one of the chief topics discussed at the Parent Teachers meeting Tuesday evening. A suggestion had been made that the Association invest \$50 in playground equipment. The next point which arose was that all this should be under supervision of the teachers.

During the early part of the summer the Mokena school had a very sad experience with playground equipment when a damaged slide caused the serious injury of one of pupils. The board had all the playground equipment removed.

The merits and demerits of such equipment was argued pro and con and it was brought out that supervised play was favored, but the question then presented itself as to whether the teachers would be required to handle this or if a regular playground supervisor would be required. O. E. McGovney, member of the school board was present and stated that personally and as a member of the school board is opposed to have any more playground equipment placed on the school grounds and showed that such equipment has also been abolished by the Joliet schools on account of accidents.

The Association also announced that plans are under way for a community Christmas tree and Christmas Party same as last year.

A program was given by the school pupils before the opening of the meeting.

IF I KNEW YOU AND YOU KNEW ME.

If I knew you and you knew me, 'Tis seldom we would disagree; But never having yet clasped hands, We both may fail to understand That each intends to do what's right And treat each other "honor bright". How little to complain there'd be If I knew you and you knew me.

MOKENA BEATS JOLIET

The Mokena football team beat Joliet bears Sunday at Pete's Place 12 to 7. Mokena scored a touch down in the 2nd quarter and in the last quarter.

Mokena plays the Ridgewood Cubs Sunday at Pete's Place.

Pfeifer and daughters Ella Mae, and Burnetta attended the christening of the infant son of Mr. and Mrs. Alfred Muff of Mokena formerly of Frankfort, last Wednesday evening at their home. The name given was Merle Milton. The sponsors were Mrs. Chas. Pfeifer and George Stellwagen. Rev. Hennig of the Lutheran church performed the ceremony.

Mrs. Adam Heisner entertained at pinocle in honor of Mrs. E. Koerner and Mrs. Christ Heisner. Mrs. LaHue captured the prize for high score. A dainty two course luncheon was served.

Next Sunday will be Reformation service in St. Peter's church. Communion will be given at both the English and the German services. In the evening will be special services first of the series of Sunday evening Bible services. Rev. Gerhold expects to have these services every Sunday evening for some time.

Miss Gussie Baumgartner of Chicago is visiting with her parents Mr. and Mrs. Albert Baumgartner.

Mrs. Elridge of Chicago is visiting with friends.

Mrs. Cosgrove, Mrs. Nekrauer and son Harry expect to leave soon for their winter home in Florida.

Henry Schroth who has been ill is better and able to be around again.

Mr. and Mrs. John Staff entertained their daughter Vera of La Grange, Illinois the week end.

Mr. and Mrs. Chas. Rahm entertained guests from Chicago, last Sunday.

Mr. and Mrs. John Stauffenberg of Green Garden spent Sunday at the Chas. Pfeifer's home.

Milton Pfeifer has been appointed the agency for the Chicago Daily News. Anyone wishing the paper please get in touch with Milton.

Mr. and Mrs. George Bettenhausen has remodeled the house he recently purchased from Philip Knater. He expects to move into it soon.

Mrs. William Kampe who has been on the sick list for sometime is improving.

A hallowe'en party was given at St. Peter's church last Friday evening. Mrs. Henry Stellwagen and Melvin Schroeder's classes entertained the Young People's Society of the church. Hallowe'en games were played and the room was decorated in hallowe'en colors. Luncheon was served.

Mrs. Will Baker is ill in her home in Green Garden.

The Frankfort M. E. parsonage is now for rent. Rev. Weishaar of Green Garden has been given charge of the Frankfort M. E. church in connection with the one at Green Garden. He will preach in Frankfort Sunday morning, Oct. 30, at 10.45.

There will be a Sunday school convention at St. Peter's church, Sunday evening, Oct. 30. Representatives from Mokena, Green Garden and Manhattan churches will be here.

Miss Eloise Kohnhagen of Champlain spent the week end here with her father, Frank J. Kohnhagen and also visited with her mother who is ill at Silver Cross hospital.

No Hunting Allowed On These Farms

The following named property owners and tenants desire to announce that they permit no hunting or trespassing on their premises:

Herman Barlewort, Konrad Bornet, Paul Christensen, John Knipple, W. Kampe, Christ Warning, C. M. Cleveland, W. C. Owen, Emil Johnson, Albert Fitzer, C. Elsnor, Glen Fuller, A. Schmuhi, Mr. Bobbie, N. Hossbach, E. Laufer, A. Guethe, Elmer Erickson, Geo. Wieland, Jno. Waldvogel, M. Smith, W. D. Roberts, B. B. Hill, John Cappel, Emil Cappel, Fred Cappel, Albert Cappel, Andrew Cappel, P. Mancke, Jay Butler, J. Scott, W. Voss, L. G. Bruder, Storm and Jensen, C. Yonker, Elvis Duncan, Fred Hinspeter, Fred Weitendorf, H. Bruggeman, Geo. Warning, Will Hentsch, Fred Yonker, A. Hauck, Chas. Erickson, E. Benson, A. Carlson, H. Gauthier, Frank Marti, L. Johnson, P. Stellwagen, Geo. Stellwagen, T. Baumgartner, H. Mincke, A. Woodman, Mr. Greenwood.

A Clarifying Statement on The Bond Issue

In the controversy regarding a proposed BOND ISSUE for WILL COUNTY, for the purpose of creating a fund to be used for constructing and maintaining a System of Hard Roads, supplementing the State Road program, as outlined in the \$60,000,000 and the one hundred million dollar state bond issues for construction of a state wide system of Highways in Illinois, some 185 in number, it appears that the main issue, the BOND ISSUE, has been lost sight of in the general scramble for individual advantage points along preferred proposed routes.

If selfishness defeated only its own selfish interests, it were not to be regretted, but often the greedy bring about the failure, temporarily at least, of the larger and broader plans of those who labor unselfishly for the greatest good to the greatest number.

THE MOKENA DEVELOPMENT AND HARD ROAD IMPROVEMENT ASSOCIATION stands today as in the beginning, for a State wide constructive policy in road building and in revenue producing legislation and procedure.

We believe that WOLF ROAD, is the logical FIRST CHOICE in a NORTH and SOUTH trunk line highway connection in Will County, and we will not be satisfied with any program that does not include this broader plan for State wide road convenience.

There are other roads of great local importance which we have favored, and do now favor, and for which we will fight as strenuously as we are now fighting for the north and south route.

In the immediate vicinity, our program would extend to the constructing of hard surfaced roads on MAPLE road through Marley, and on Francis road from the WOLF road at Mokena west through the park system to Joliet. These with intersecting roads taking care of the local situation and affording favorable connections with Cook County projected lines.

The construction of the roads would be of great value to the farming community and bying about a closer relationship between the principle municipality, Joliet and the surrounding Cities and Villages.

As a state wide policy, we are in favor of an adequate belt line system around every City of importance in the state, and we are for any reasonable plan of connecting links in the Joliet belt line that will make the system a reality in the Will County metropolis.

We have no narrow ideas with regard to the right of a survival of the fittest. We recognize the fact that Real Estate promoters and investors have been among the most important and greatest factors in development and progress, and we want to give them all the latitude reasonably consistent, but we reserve the right to withdraw assistance from "private interest" where we believe such "interest" would interfere with "public good."

The same liberal view extends to the needs and necessities of other sections of the County, in the roads demanded, which are of local as well as of state wide importance.

The position taken by our association is of the most broad and comprehensive nature. Wolf road would benefit Mokena while providing an inlet and outlet from north and south of inestimable value to Cook, Will and Kankakee counties and points beyond. Maple street would give us a closer association with Marley, while affording a convenience to them, and Francis road, we look upon as a very important county highway as it would be a great factor in establishing community interest by affording easy access to the Joliet Park System.

We are for Wolf Road and other roads. We are for a County Bond Issue. It is the logical solution of the quick action road construction problem. Selfish, narrow and biased interests are the only factors that can defeat or delay it.

The sentiment as outlined, expressed in resolutions, unanimously adopted, are on file in the records of the Mokena Development and Hard Road Improvement Association and have been published from time to time in the News-Bulletin.

Don C. Hall, Pres. M. D. & H. R. I. Association.

To Debate New School Question

The question of a new school for Mokena has been agitated time and again, but now the proposition is receiving special attention and the first move toward creating public interest and sentiment in the matter will be made next Wednesday night when a debate for and against a new school will be held by the Brotherhood of St. John's Evangelical church in the church parlors. Everyone is invited to come and hear the views to be expressed.

Genial Crowd Celebrated "Pete's" Saturday Night

A very genial and happy crowd of 75 guests gathered at the home of Mr. and Mrs. Peter Michelsen in Mokena Saturday night to help celebrate Mr. Michelsen's birthday.

The rooms were prettily decorated with corn stalks, pumpkins, squash, corn, oak leaves and flowers.

The guests made merry with all kinds of games, dancing the old time square dances to music of W L S over the radio.

A bountiful luncheon was served following which the guests played another game and then departed for their homes.

Mr. Michelsen received many gifts and made a very appropriate speech. His many friends wish him many more such occasions.

The guest list included a large number of friends from Chicago, Mount Greenwood and Mokena.

Worth Model Home Finished

The model home which was built by the Worth Good Fellowship club is just about completed. Here is a home that is equipped with all the modern conveniences one could ask for, situated at 11th and Harlem ave., in a wonderful location. This home is surrounded by nature's beautiful scenery in Arthur Dumas subdivision which is laid out in large lots, wide streets and concrete walks all thru the subdivision. Here is a home which will be for sale soon and can be purchased at a reasonable price owing to the fact that it was built by the Good Fellowship Club, proving what an organization of this kind can accomplish.

Mrs. Hoffman, formerly Elsie Vande Berg of Worth, had her baby baptized during the Sunday morning services.

Tinley Plants Live Christmas Tree

Tinley Park and friends from neighboring towns gathered together on Saturday afternoon, October 22nd, to dedicate the live Christmas tree in the town square.

The beautiful blue spruce has been planted in the center of the square. The ceremony began with prayer by Rev. Jochum. Mrs. W. B. Combs, Sr., recited Joyce Kilmer's poem, "The Tree". Mrs. John Boyer and Mrs. Harry Mager accompanied by Edwin Hug, sang "Tannenbaum". Rudolph J. Hug, master of ceremonies, spoke of the age of Tinley Park. He said that because the town was old in years it was not necessary to be old fashioned. He stated that they must progress and keep up to date. Mr. Hug said that Tinley Park had the best of churches with the best of ministers and the best of schools with the best of teachers, and now the time has come to make the town as beautiful as it was possible to make it.

Mrs. Wm. Funk, president of the Garden club, spoke of plans to start at once to landscape garden the square. The club hopes to have a pool in one corner. Mrs. Funk said that the work of wiring the tree would begin at once, so that the tree would be ready for old fashioned community Christmas for the kiddies. The tree will be kept lighted during the Holiday season.

All joined in singing the Star Spangled Banner. Rev. Jochum gave the benediction and all repeated the Lord's Prayer together.

Cow Sale at Mokena Nets \$12,000

The best cow sale ever held in this section was held by Ed. O'Brien at Mokena last Saturday when a select lot of cows and springers were sold.

Buyers came from all over Will and part of Cook counties. The sale netted over \$12,000. Some cows sold well over \$100 per head.

Ed. Schmaedeke of Orland was the auctioneer.

St. Michel's Orland, To Hold Bazaar

There will be a bazaar given by St. Michael's church on Nov. 2nd and 5th. Everybody is welcome.

The Wednesday evening dinner will be given by the Ladies and the Saturday dinner by the men.

THE WEATHER

Oct. 28 threatening; 29 disagreeable; 30 stormy; 31 stormy; Nov. 1 2 mild; 3 pleasant; 4 pleasant.

Mokena Market Robbed Wed. Eve

The meat market of Harvey Reab in Mokena was robbed Wednesday night, about 9 o'clock.

A stranger came to town in an auto during the afternoon and remained about the shop all evening.

Mr. Reab had just waited on a customer and as he opened the cash drawer to make change he was astounded to find that a roll of bills amounting to \$30 was gone.

Mr. Reab was in a rear room of the market during the evening and it is thought the robber sneaked in and robbed the cash drawer without Mr. Reab hearing a sound.

The stranger and his car vanished after the robbery.

The Latest News In Tinley Park

The 3rd District I. F. W. C. gave a card and bunco party in the Highway Garden, Chicago, last Thursday. Several of Tinley Park women were there.

The Gresham Woman's club, Chicago will hold their Annual Art Day exhibition Wednesday, Nov. 2nd. Mrs. Wallace B. Combs is chairman. Hand crafts by women of the club will be shown also home economics and a display of Hooked rugs. Some of the women in Tinley who have made beautiful rugs have been invited to attend and place their handiwork on exhibition.

Hand work by the children of the Gresham School will be shown also, even to the clay modeling and paper designs of the kindergarten.

There will be an Art luncheon at noon. At 2 p. m. Mrs. Abbie Adler of Oak Forest who in her travels abroad has secured a marvelous collection of paintings will have them on display and will describe the pictures and give the name of the Artists who did the work. Ribbon awards will be given.

Mr. and Mrs. J. C. Andres motored to Joliet, Sunday.

Special services were held in the Community Hall, Sunday. Evangelist Hick preached in the afternoon and Mr. Jones in the evening. The music was splendid especially the solo "The Lord Is My Shepherd" sung by Miss Ethna Jochum. There was a good attendance. Evangelist Hick will speak Sunday, Nov. 6.

Mr. and Mrs. Henry Schaumburg of Racine, Wis. were week end

guests in the home of the Schaumburgs of Tinley Park.

Mrs. J. Keleher entertained her bunco club at dinner, Wednesday the 26th.

Mr. and Mrs. W. A. Combs entertained some of their Chicago friends at a Hallowe'en party, Saturday night.

Irwin Bettenhausen and family re now residing in Tinley Park.

Mrs. James Keleher entertained her friends in honor of her birthday last week. She received many gifts and hearty congratulations.

Mrs. Elmer Keuch entertained the "Smiling Thru" club last Tuesday.

Mrs. Morrison who has recently moved to Tinley Park is entertaining her daughter and child of Chicago.

BACHELOR'S GROVE LUTH. CHURCH

Wm. Greve, Pastor.

Special Reformation services will be held next Sunday at 10 o'clock a. m. Sunday school at 9:30 o'clock. Young People's Society meets Thursday evening, Nov. 3.

Ladies Aid meets on Thursday, Nov. 10. The annual supper and sale will be held at Saenger Hall, Thursday, Nov. 17.

Rev. Wm. Greve and family were called to Milwaukee, Wis. last Monday, on account of the death of Rev. Greve's mother. The funeral was held Thursday.

Tinley Park Parent Teacher Association

The object of the above named association is to bring into closer relation the home and the school that the parents and teachers may cooperate intelligently in the training of the child, and develop between educators and the general public such united efforts as will secure for every child the highest advantages in physical, mental, moral and spiritual education. Friday, November 1, 1927 will be "Father's Night".

The meeting will open at 7:45 at the school house. A very good program is assured. We will have with us at this time a speaker from the Illinois State Medical Society. The subject of his address will be posted at a later date. Come bring your husband, brother, father, grand father and friends. Oh yes we want the ladies too. In fact every one who is interested in this great work is invited.

Mrs. John Swisher, (President)

There is less unemployment in Illinois today than in any previous month this year, a monthly report issued by the Illinois department of labor revealed. Two-tenths per cent more workers had jobs in September than in August. The improvement was due to the fact that the building and mining industries were increasing activities, and was said not to be general in all trades. Coal mines reported 70.3 per cent more workers in the pits during September even before the agreement ending the strike. Seven of the fourteen leading Illinois industrial centers report increases in factory employment during September. Fruit and vegetable canning activities led to the greatest gains.

The state division of highways awarded the following contracts recently:

Route 130, Section 122, Jasper-Richland counties, pavement, to J. I. Ransom, Palestine, \$100,295.30.

Route 29, Section 135B, Iroquois county, bridge, to Chermus Construction company, Sioux City, Iowa, \$16,741.55.

Route 49, Section 136B, Iroquois county, bridge, to Chermus Construction company, Sioux City, Iowa, \$15,845.

The shadow of the immortal Lincoln loomed into the foreground recently and played a prominent part in the lives of 362 women and men from various parts of the state who received their law diplomas from the Supreme court. The class was presented to the Supreme court by Hon. Albert Watson, Mount Vernon, chairman of the board of law examiners, and the oath was administered by Chief Justice Oscar E. Heard. After receiving their sheepskins the class listened to an address at the Hotel Abraham Lincoln by Paul Angle, secretary of the Lincoln Centennial association, and visited points made historic by Lincoln and received booklets on the doings of Lincoln in Springfield.

The weekly report of Dr. I. D. Rawlings, director of public health, revealed that there were only two cases of infantile paralysis in Cook county and 24 scattered at large over the state. There are now 115 cases of diphtheria in the state, 134 of scarlet fever, 28 of typhoid fever and 18 of smallpox.

Chicago will be able to call herself "the City of Four Million Souls" in another year if the population continues to increase at the present rate. The Windy City's census figures are now 3,741,910 and are a gain of 1,040,205 in seven years, according to Frederick Rex, municipal reference librarian, in an estimate on the increase in the city's registered vote.

James A. Cochran, ninety, one of the oldest residents of Macon county, and a veteran of the Civil war, died at his home recently in Decatur. At the close of the Civil war Mr. Cochran was flag sergeant at the statehouse.

The Illinois Chamber of Commerce, in the closing sessions of its convention in Chicago, re-elected John H. Camlin of Rockford as president of the organization. The chamber, through its waterways committee, on the closing day of the convention devoted much attention to the Mississippi valley flood problem. Senator Charles S. Deneen, Col. A. E. Schulz, U. S. A. district engineer at Chicago and member of the Mississippi river commission; Congressman Frank R. Reid, chairman of the flood control committee of the lower house, and Mayor Thompson of Chicago presented their thoughts on the subject, all agreeing that it should be recognized as a national problem.

State approval of four highway projects, to be constructed with refunds from the state on the gas tax and Beardstown road has been asked. The improvements consist of the following: Paving from Buffalo to Mechanicsburg, 16 feet wide, appropriation of \$90,500 from the refund on the Beardstown road; paving from Bates to Loomis, three miles, 16 feet wide, \$90,000 appropriated from the Beardstown road refund; paving of Sangamon avenue between Peoria and Decatur hard roads, 18 feet wide, appropriation from Beardstown road refund of \$90,000; construction of a new bridge over the south fork of the Sangamon river north of New City on the road to Rochester, 18 feet wide, made of reinforced concrete, appropriation of \$24,000 from the Beardstown road refund and \$40,000 from the gas tax.

A joint report issued by the Illinois and Federal Departments of Agriculture stated that Illinois corn conditions improved seven points under unusually favorable September weather. Corn continues late and needs until late October without frost to mature 75 per cent of the crop. Corn was rated at 60 per cent normal on October 1. At the close of September crop correspondents reported 28 per cent of the state crop as fully matured, 40 per cent in the dough, 24 per cent in the milk and 8 per cent below the milk stage of development.

Increased effectiveness of the national defense act passed by congress in 1920 is expected to follow action taken by reserve officers of Illinois at the recent annual convention of their association held in Chicago. At this meeting a plan was set in motion to secure a personal replacement or "understudy" for every reserve officer of the state. When it is understood that in the event the United States again becomes involved in war, 240,000 officers will be required the first year to train citizen soldiers, the need for additional officers becomes apparent at once.

The Illinois replacement plan provides that every reserve officer in the state is to sponsor a young man who has had training either in the Reserve Officers' Training corps of some college or school, or in the citizens' military training camps. Officers are asked to make the acquaintance of these young men and assist them in every manner to complete the military education which is supplied without charge by the government. It is expected that the personal interest shown by officers in the education of these young men will go far toward inculcating in them a genuine desire to improve their knowledge of citizenship obligations.

Secretary of War Davis, commenting upon the activities of Illinois reserve officers, stated: "The R. O. T. C. and the C. M. T. C. are the elements of our national defense system to which we look for eventual succession to leadership of the organized reserves. Promotion of those elements operates to guarantee permanency to many of our national defense organizations. Upon the young men of the camps and training units will depend the extent of future benefit to the nation from our present efforts. I shall watch with interest the success of the replacement idea. . . . Such a method seems to have great possibilities for the establishment of a close relationship between elements of the army of the United States."

Groups of officers in various cities of the state are taking steps to put the replacement plan into operation. At Galesburg the local chapter of the Reserve Officers' association has invited every C. M. T. C. student of Knox county to meet with members of the association, for a discussion of national defense matters. Each officer is expected to "adopt" a student and tutor him in military affairs. At Champaign the local chapter has undertaken to look after the interests of the entire corps of cadets, numbering some 3,000 students. Cook county chapter is co-operating with the R. O. T. C. unit at the University of Chicago. At Evanston reserve officers have thrown open their meetings to students of Northwestern University Training corps.

It is believed that the impetus which this plan will give to more intensive study of citizenship responsibilities will insure similar action being taken by other state organizations. Wide-spread and practical application of the Illinois replacement plan will go far toward making our national defense act all that the term implies.

NEW LAWS OF ILLINOIS

[This is a continuation of the list of bills that were passed by the fifty-fifth general assembly and have received the signature of Governor Small, or have been allowed to become laws without his signature.]

House bill 553 (McCarthy). Amends section 3 of the title of an act to regulate public warehouses and inspection of grain, etc., April 25, 1871, and adds sections 6a, 6b and 6c thereto. Places enforcement of act under the Illinois commerce commission instead of the board of commissioners of railroad and warehouses. Relates to warehouses corporations operating on flexible unit plan; ownership of capital stock of such companies; contracts for the purchase or sale of grain; and approval of regulation relating to warehousing of grain by the Illinois commerce commission. Prohibits operators of class A public grain warehouses from storing in such warehouses any grain in which they have an interest.

House Bill 469 (Kersey). Amends section 4 of the act regulating the practice of embalming so that after July 1, 1929, any person applying for a certificate of a registered embalmer, or as an apprentice to a registered embalmer, must furnish proof that he has completed a four-year high school course in a high school recognized by the department of registration and education, or its equivalent as determined by the department of registration.

House Bill 419 (Fekete). Provides for the incorporation of mutual benefit associations on the assessment plan, intended to benefit the widows, orphans, heirs and devisees of deceased members thereof and the members who have received a permanent disability. Provides for and regulates the control of such associations by the department of trade and commerce. Specifies membership fee, number and election of directors and prescribes the method of paying benefits. Penalties.

House bill 440 (McClugage). Amends section 4 of act relating to board of school inspectors in any school district of from 10,000 to 100,000 inhabitants, governed by special act of the general assembly, approved June 27, 1913. Removes provision relating to additional security and approval thereof by school officials, in the loaning of school funds provided for in such section.

House bill 561 (McAdams). Amends section 91 of the school law of 1909 provides that polls shall be opened no later than noon and shall not be closed before 7 p. m.

- 18—An interesting plant of the Sunflower family which bears leaves serving as traps to capture insects. It is found in North and South Carolina.
- 19—William M. Jardine of Kansas.
- 20—May 8, 1816.

Younger Indians Turn From Faith of Fathers

Sixty or seventy years ago the Fox Indians of Iowa began the acquisition of the English alphabet from missionaries. They learned a method of writing their own language by means of the English alphabet, separating their words into syllables. Since there is only a rough conformity between the characters as employed by the Fox Indians and the actual sounds, it is necessary to restore the phonetics of any Fox text so that the symbols may correctly represent them. Dr. Truman Michelson, of the Smithsonian Institution's Bureau of American Ethnology, has been foremost in this work of collection and restoration.

Doctor Michelson, whose work has made him the foremost authority on the Fox Indians, describes their rituals as consisting mainly of eating, dancing and prayer. As is natural with a primitive people, their prayers invite material benefits such as long life, freedom from disease, that the chief's village should be strong enough to resist its enemies, and that no foe should even be permitted to gossip against the village.

According to Doctor Michelson, the younger generation now turn these once serious ceremonies into occasions for amusement. Up to some 15 years ago the tribe was so conservative as to resist education, but it has since grown progressive and all the young Indians are anxious to go to school. The tribe are good farmers and compete with the whites in the state agricultural fairs.

Very Concrete

"Oh, you Easterners can boast of your fine buildings and their splendid workmanship," said the Angeleno, "but my way we are so careful what we put in a building that we even inspect every grain of sand."

"Maybe so," retorted the Bostonian "but here in the East our buildings go up so quick we have to use quicksand to mix with our cement before it solidifies. Otherwise the cement would be all up in the forms before the sand got in it."—Los Angeles Times.

Around Orchard

SAN JOSE SCALE DORMANT SPRAY

Sprays for controlling San Jose scale cannot be used on fruit trees in foliage, but must be used when they are leafless and dormant, according to W. R. Martin, horticulturist at the Kansas State Agricultural college. Before spraying, the trees should be properly pruned and the prunings burned immediately.

Mix liquid lime sulphur for the dormant spray at the rate of 6 gallons with 44 gallons of water, explains Mr. Martin. This spray can be used on all kinds of fruit trees. It assures good control of San Jose scale and of certain fungous diseases.

Effective summer sprays for apples and pears are lime sulphur and bordeaux mixture. Use lime sulphur at the rate of 1½ gallons to 50 gallons of spray. More safely applied during cool, damp weather, this spray controls apple scab.

Bordeaux mixture is a solution of copper sulphate or blue vitriol and of freshly slaked or hydrated lime. On apples use 3 pounds of blue vitriol, 4 pounds of stone lime or 6 pounds of hydrated lime, and 50 gallons of water. Bordeaux mixture also can be purchased already prepared.

Unlike the lime sulphur spray, the bordeaux treatment may be safely applied in dry hot weather and controls apple blotch and other fungous diseases on apples, according to the horticulturist.

Martin recommends the use of arsenate of lead in every summer spray, but never in the dormant spray. Arsenate of lead to kill biting plant insects should be used at the rate of 1½ to 3 pounds to 50 gallons of water for apples, with a slightly weaker solution for cherries, peaches and plums.

How to Attain Success With Commercial Fruits

To attain greatest success in commercial fruit growing, the grower must produce fruit of the highest quality, referring particularly to flavor or agreeable taste. This means that attention must be given to the selection of site and soil, to the varieties to be grown, and finally, to the care of the orchard. "Quality fruit requires quality care" is an old but ever applicable expression. Quality care consists in creating a favorable environment for the tree by tillage, irrigation and fertilizing; in encouraging a well-balanced development of fruit-bearing surface by judicious pruning; in preventing overcrowding of the fruit by thinning; and, in controlling insect and plant-disease pests by spraying, dusting, or fumigation.

In the past, the ability to market fruit depended almost exclusively upon its attractive appearance, as witnessed by the ready sale of the highly colored Ben Davis apple 40 years ago. High color and attractiveness are no less a factor in fruit-selling at the present time, but the trade now demands that quality be combined with these other features.

Guide for Best Time to Harvest Winter Apples

No one has yet devised a sure guide for the time to pick winter apples. Many rules have been formulated, but none of them adequate under all conditions, writes R. J. Barnett of the Kansas State Agricultural college. Apples picked too early will not develop their characteristic flavor and aroma and are likely to wilt in storage. If they are picked too late, their storage life is much shortened. About the best that most growers can do is to harvest winter apples when they have commenced to develop their characteristic flavor. That is the time when seeds have turned brown, when the defective fruits begin to drop from the trees, and when adequate color has developed. Some varieties, such as Grimes, are much more valuable if two pickings are made instead of one.

Plow Deeply to Catch Winter Rains and Snow

The orchard is plowed deeply in the fall and left rough so as to catch the winter rains and snows. During the spring months it is kept cleanly cultivated, the ground being left as smooth as possible after each cultivation. This is usually done by attaching a float to the rear of the cultivator. During the latter part of June, just before the summer rains begin, it is again necessary to roughen the surface in order to conserve the rainfall. It is not well to plow the orchard at this season, so the desired result is had by deep disking. Cultivation should follow as often as necessary to kill all weeds and grass.

Nursery Fruit Stock

A. G. Ruggles, Minnesota state entomologist, warns against the purchase of nursery stock that has not been inspected and certified by duly qualified state officials. Information has been obtained that many uncertified plants were sold in recent months, particularly small fruit plants such as straw berries and raspberries. According to Mr. Ruggles many of these unsupervised plants are diseased and unfit to plant and spread disease to other plants.

Faith

Faith never refers to self, but always to the Word of God. There are many who want to feel that they are believers before they have believed the truth, and to feel that they are safe, before they trust in Jesus.

Our Faith

When the devil tries our faith it is that he may crush it or diminish it; but when God tries our faith it is to establish and increase it.—Marcus Rainsford.

Lesson for October 30

AMOS DENOUNCES SIN

(World's Temperance Sunday.)
LESSON TEXT—Amos 2:4-12.
GOLDEN TEXT—Seek good and not evil, that ye may live, and so the Lord the God of hosts shall be with you as ye have spoken.
PRIMARY TOPIC—The Punishment of Sin.
JUNIOR TOPIC—What God Thinks of Sin.
INTERMEDIATE AND SENIOR TOPIC—Why the Drink Traffic Is Prohibited.
YOUNG PEOPLE AND ADULT TOPIC—Intemperance and Associated Evils.

Amos, a shepherd and tradesman (Amos 7:14, 15) was called to prophesy for God. He was neither in the prophetic line, nor trained in the prophetic schools.

I. The Sins of Judah (2:4, 5).
In the first part of the book Amos sets forth judgments upon the surrounding nations. The aim, doubtless, was to show that there is no escape from God's judgment. The nation or individual that sins shall surely be judged (Num. 32:23).

1. They despised the law of the Lord. To despise means to spurn, to disregard. To despise God's law is a sin directly against God. There is no escape from judgment for such as do this. (Heb. 10:28, 29).

2. Failed to keep the Lord's commandments (v. 4).
Disobedience logically follows the despising of God's law. It not only robs of blessings in this life, but results in eternal destruction (II Thess. 1:7-10).

3. Lies caused them to err (v. 4).
Because they despised God's law they fell into lying errors. Doctrine and conduct are inseparable. Thinking wrong precedes doing wrong.

4. Judgment upon Egypt (v. 5).
This was literally fulfilled a century and a half later in the capture of Jerusalem by the Chaldeans.

II. The Sins of Israel (2:6-8).
The message of the prophet now comes directly to the northern kingdom.

1. "Sold the righteous for silver" (v. 6).

The judge, for a bribe of silver, declared the innocent to be guilty.

2. "Sold the poor for a pair of shoes" (v. 6).

Likely this refers to the practice of selling into slavery the debtor who could not pay for a pair of shoes which had been sold to him on time.

3. "Pants" after the dust of the earth on heads of the poor (v. 30).
The word "pant" means to eagerly desire. So avaricious had these men become that they even grasped after the earth which the down-trodden poor cast upon their heads in mourning because of their misery.

4. Turned aside the way of the meek (v. 7).

These grasping rich men turned aside the meek; that is, those who would not stand up for their rights.

5. Licentiousness (v. 7).
So notorious were the immoralities practiced that they were even guilty of incestuous prostitution. This was not merely the case of falling into sensuous sin, but was indulged in with the definite purpose of insulting God, provoking His holy name.

6. Idolatry (v. 8).
They not only frequented the place of idolatrous worship, but lay down on the clothes taken from the poor, and drank wine bought with money extorted from the poor in unjust fines.

III. God's Goodness to Israel (vv. 9-12).

God's manifold blessings and His goodness are now presented in contrast with the base practices of the nation, in order to heighten the picture of their ingratitude.

1. Destroyed their enemies (v. 9).
The Amorites stands for all powerful peoples whom God removed from Palestine to make room for Israel.

2. Delivered from cruel bondage (v. 10).

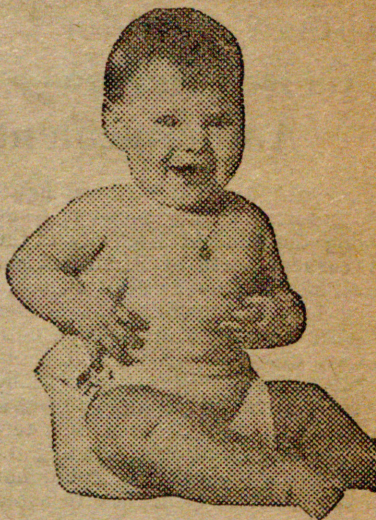

God set them free from the cruel slavery of the Egyptians. Every redeemed one has been set free from a more cruel bondage than that of the Israelites at the hands of the Egyptians (John 8:34-36).

3. Led them for forty years in the wilderness (v. 10).

The wilderness wandering is a most wonderful story, showing the tender and faithful leading of God.

4. Raised up the prophets (v. 11).
God not only bestowed great honor upon them in this, but favored them in raising up prophets from among their own offspring. The awful sin and guilt are here shown in that they not only turned the prophets from their lives of separation but gave them wine to drink.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for

Fashionability is a kind of elevated vulgarity.—George Darley.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster without the burn. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, cramp, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

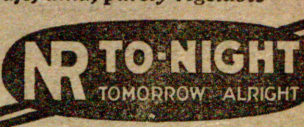

Better than a mustard plaster

Bilious?

Take NR—NATURE'S REMEDY—to-night. You'll be "fit and fine" by morning—tongue clear, headache gone, appetite back, bowels acting pleasantly, bilious attack forgotten. For constipation, too. Better than any more laxative.

Safe, mild, purely vegetable—

At Druggists—only 25c

Makes Life Sweet

For seven generations the National Household Remedy of Holland for kidney, liver and bowel troubles has helped make life brighter for suffering men and women. Begin taking them today and notice how quickly your troubles will vanish. At all druggists in 3 sizes.

HAARLEM OIL CAPSULES

DR. STAFFORD'S LIVE TAR

Excellent for Croup and colds. Relieves congestion, hoarseness, coughing. Taken internally for influenza, membrane of throat and bronchial tubes. HALL & ECKEL, New York

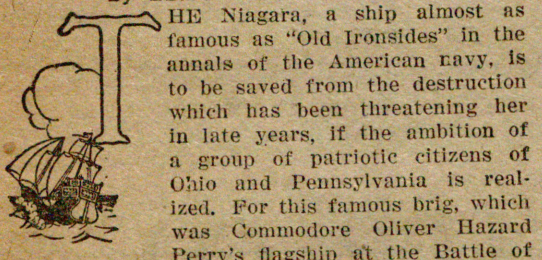

FOR bronchitis

To Save Historic Niagara

DON'T GIVE UP THE SHIP

PERRY'S BATTLE FLAG Harris & Ewing

By ELMO SCOTT WATSON

THE Niagara, a ship almost as famous as "Old Ironsides" in the annals of the American navy, is to be saved from the destruction which has been threatening her in late years, if the ambition of a group of patriotic citizens of Ohio and Pennsylvania is realized. For this famous brig, which was Commodore Oliver Hazard Perry's flagship at the Battle of Lake Erie in the War of 1812, has fallen on evil days and is slowly rotting away at the Municipal pier at Erie, Pa. However, at a meeting held in Cleveland, recently, through the initiative of Frank Wilford, an Elyria (Ohio) attorney, the Perry-Niagara Memorial association was organized with the sole purpose of restoring the Niagara before it is too late.

The charter members of the association who have joined to save the old brig include:

CLEVELAND.—Congressman Theodore E. Burton, Supt. R. G. Jones, E. H. Baker, president of The Plain Dealer Publishing company; Congressman Charles A. Mooney; J. R. Nutt, president of the Union Trust company; Rt. Rev. Joseph Schrembs, bishop of the Catholic diocese of Cleveland.

ERIE, PA.—W. D. Kinney, superintendent of parks and public property; Congressman Milton W. Shreve; A. J. White, managing editor of the Dispatch-Herald; Rev. Harry Burton Boyd; Attorney A. E. Sisson, president of the Perry Victory Memorial commission.

LORAIN, OHIO.—Common Pleas Judge W. B. Thompson.

PUT-IN-BAY, OHIO.—Mayor T. B. Alexander, John D. Day, hotel owner; Webster F. Huntington, secretary of the Perry Victory Memorial commission.

SANDUSKY, OHIO.—Congressman James T. Begg, Sidney Frohman, president of the Hinde & Dauch Paper company.

TOLEDO, OHIO.—George E. Hardy, secretary of the Toledo port commission; Carl Vitz, public librarian.

BUFFALO, OHIO.—W. J. Connors, publisher of the Buffalo Courier and Express.

ELYRIA, OHIO.—Attorney Frank Wilford.

AT LARGE.—United States Senator Frank B. Willis.

At the Cleveland meeting of the charter members a committee composed of Mr. Wilford as chairman, Fred Charles of the Cleveland Plain Dealer and W. D. Kinney, superintendent of parks and public property of Erie, Pa., was appointed to carry on the plans for the restoration.

Now Lies in the Mud

The brig was built in Erie and returned there after the battle. Then it sank in Misery bay, but was raised and rebuilt by the state of Pennsylvania in the year 1913 for the Perry centennial and made a triumphant tour of the Great Lakes. It was then given to the city of Erie by the state and since that time has been maintained as a free museum, visited every year by thousands of patriotic pilgrims. Lack of finances, however, have prevented the city from keeping it in seaworthy condition and it now lies on the mud in the harbor and is leaking badly.

According to Mr. Wilford, an attempt will be made to raise a fund of \$25,000 by popular subscription to restore the historic one hundred fourteen-year-old brig, with something left over for an endowment fund. Title to the ship will remain with the city of Erie, but the association plans to borrow the vessel from the city for an annual patriotic cruise among the Lake Erie cities each summer, where it can be visited by thousands as an object lesson in history and patriotism. Since the victory which Perry won in this ship was such an important one in our national history, the association believes that patriotic Americans everywhere will be glad to share in the responsibility of saving it.

Not only was the Battle of Lake Erie, in which the old Niagara bore such a proud part, an important one because of the results of Perry's victory, but it was also one of the most romantic incidents in our history. The youth of the commander, the apparent hopelessness of his task, the desperate nature of the fighting, the thrilling incident of his transfer from the shattered Lawrence to the Niagara which proved to be the turning point in the battle, and his laconic message to General Harrison, announcing his victory, all combine to make it so.

Control of Lake Erie Vital

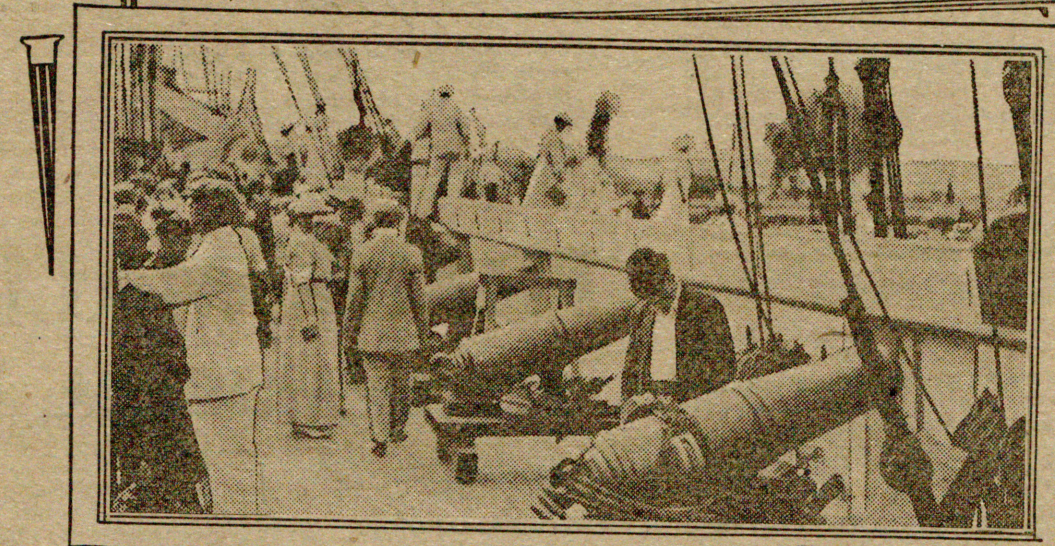

Here is the story of that battle with some details which the school histories do not give:

When General Hull surrendered at Detroit in July, 1812, it at once became apparent that control of Lake Erie was going to be a vital factor in the war between Great Britain and the United States. Immediately both Americans and British began construction of war vessels and there soon developed a thrilling race with time. There was feverish activity in the British shipyards at Malden, opposite Detroit, and far to the east in the harbor of the little town of Erie there were even more anxious moments. For upon Oliver Hazard Perry, a native of Rhode Island, who had reached the rank of commander although not yet twenty-eight years old, rested the responsibility for building and manning a fleet which could successfully cope with the naval power that Great Britain was preparing to place upon the lake.

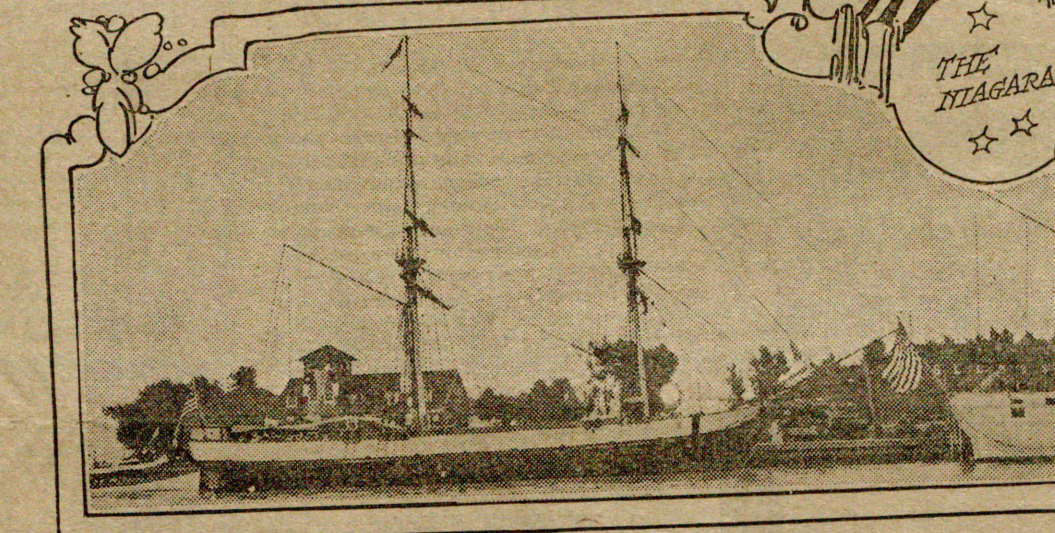

When he came to Erie, only the materials for his ships were there and those materials were the unwhim timber of the forest. Shipbuilders, sailors, naval stores, guns and ammunition had to be brought thither from distant points over roads which were little better than mere trails. Letter after letter he wrote to his superiors in the East, begging for more men, more supplies, more money, more of everything which he would need

THE TURNING POINT OF THE BATTLE Underwood & Underwood

VISITORS ABOARD SHIP

if he were to cope successfully with a powerful enemy. A lesser man than Perry would have despaired, but he refused to be daunted by his handicaps. And so after months of labor, the last of his ships were launched at the mouth of Cascade creek and on July 10, 1813, he found himself in command of the following: the brig Lawrence, his flagship, 20 guns; the brig Niagara, 20 guns; the brig Caledonia, three guns; the schooner Ariel, four guns; the schooner Scorpion, two guns and two swivels; the sloop Trippe, one gun; the schooner Tigress, one gun; the schooner Porcupine, one gun, and the schooner Somers, one gun.

Irked by Shortage of Men

He had his fleet now but not enough sailors to man them! "Think of my station," he wrote in one letter, "the enemy in sight, the vessels under my command more than sufficient and ready to make sail, and yet obliged to bite my fingers with vexation for want of men." But after many delays the arrival early in August of Capt. Jesse Duncan Elliott, second in command, with 100 men enabled Perry to venture out into the lake. He reached Sandusky August 17 and was met there by General Harrison who came aboard the Lawrence to confer with Perry on the fall campaign. Then he sailed out into the lake to look for the enemy.

On the morning of September 10, 1813, the look-out on the Lawrence sang out "Sail ho!" and in the distance off Put-in-Bay the Americans saw the long-awaited British fleet advancing in faultless battle array. Commanded by Robert H. Barclay, who had fought with Nelson at Trafalgar and lost an arm in that historic engagement, the enemy consisted of the ship Detroit, 19 guns, one pivot and two howitzers; the ship Queen Charlotte, 17 guns and one howitzer; the brig Lady Provost, 13 guns and one howitzer; the brig Hunter, 10 guns; the sloop Little Belt, three guns, and the schooner Chippewa, one gun and two swivels.

Strength of Fleets Compared

Of the relative strength of the two fleets, Bancroft, the historian, says:

In ships, the British had the superiority, their vessels being stronger and their forces being more concentrated; the American gunboats at the right of the American line, separated from each other by at least a half cable's length, were not near enough for good service. In the number of guns the British had 63, the Americans, 54. In action at a distance, the British, who had 35 long range guns to 15, had greatly the advantage; in close action the weight of metal would favor the Americans. The British commander had 150 men from the royal navy, 80 Canadian sailors, and 240 soldiers, mostly regulars, and some Indians, making, with their officers, a little more than 500 men, of whom at least 450 were efficient. The American crews, of which about one-fourth were from Rhode Island, one-fourth regular seamen, American and cosmopolitan, about one-fourth raw volunteers from Pennsylvania, Ohio, but chiefly Kentucky, and about one-fourth blacks, numbered on the muster roll 490, but of these, 116 were sick, nearly all of whom were too weak to come on deck, so that the efficient force of the squadron was a little less than 400.

As the American fleet advanced to attack, led by the Lawrence, the Detroit opened fire. Its first shot fell short, but the second went crashing through the Lawrence and before the other American vessels could come to his support, the long guns of the enemy were centered with deadly effect upon Perry's flagship. It was struck many times before he could get close

enough to open fire effectively and even then, with the Niagara and other ships hanging back, his ship seemed doomed to destruction as the combined British fire raked her.

British Strike Colors

For nearly two hours the battle raged furiously until the Lawrence lay on the waters a dismantled wreck, her rigging shot away, her spars battered into splinters, all of her guns but one dismantled and her decks, slippery with blood, strewn with the dead and dying. The masts carrying the Stars and Stripes and the blue flag, bearing the large white letters "Don't Give Up the Ship!" the dying words of Capt. James Lawrence, for whom the flagship was named, were shot down, but Perry's sailors raised them again on spars for flagstaffs. Finally Perry saw that his cause was hopeless if he remained on the Lawrence. With the aid of a few men who were not yet disabled he loaded the remaining gun, dragged it forward and fired a last shot at the British. Then, telling those left on board to keep the Stars and Stripes floating to the last, he gave orders for a boat to be lowered to carry him to the Niagara in which he proposed to carry on the fight.

Descending into this boat and carrying with him the blue flag, he was rowed amid a storm of bullets and grape-shot to the approaching Niagara where he raised his banner and bore down swiftly upon the enemy. In the meantime the flag on the Lawrence had been shot away for the last time, and seeing it fall, the British raised a cheer. But just then the Niagara, supported by the other vessels, closed in on the British ships and their guns raked the Detroit, the Queen Charlotte, the Lady Provost and the Little Belt. Within a short time, the British ships struck their colors. The battle was over and defeat had been changed to victory.

Perry's Laconic Message

On the decks of the Lawrence the survivors of the crew raised the Stars and Stripes again and in the cabin of the Niagara Commander Perry sat down to write a letter to General Harrison. And this was the message which Midshipman Hugh Nelson Page of the Ariel, who had been selected to bear it, carried to the commander of the American military forces:

*The law on the river and they own.
Two Ships, two Brigs one
Schooner & one Sloop.*

*Yours, with great respect and esteem
O. H. Perry*

Back in the little town of Sandusky the inhabitants listened to the roar of battle that came across the waters with anxious fear and wonder. If Perry won, it meant peace and security for them. If the British won it meant a British invasion and the onslaught of their savage allies led by Tecumseh against the towns of Ohio. So there was rejoicing when the arrival of Midshipman Page brought them the news of a glorious victory. One by one the British ports on Lake Erie fell into the hands of the Americans and "hostile arms no longer vexed Erie's broad expanse and forest-fringed borders."

Rare Collection of Coins and Currency

One of the most valuable collections of old United States coins of every denomination is owned by H. DeLong, of No. 314 South Twelfth street, Philadelphia.

Mr. DeLong has been collecting old coins and paper currency since his childhood days. He is now sixty-one years old. In a gold frame he has a collection that he values at \$1,000. The redeemable value of the framed currency in an American bank would be approximately \$62.

One of the most unique coins in the collection is a brass, undated cent. On one side of the cent is engraved a bust of Washington. On the other side is inscribed "Success to the United States."

In the frame are other such rare coins as 25-cent, 50-cent, \$1 and \$3 gold pieces. Three, 5, 10, 15, 25 and 50-cent denominations of shipplasters are also included in the collection. Also half-cent coppers that date back to 1797.—Philadelphia Record.

A Voice That Wants to Reach Every Mother

Flint, Mich.—"I am the mother of eight children and during each of my expectant periods I took Doctor Pierce's Favorite Prescription and it kept my nerves in good condition, kept me so well and strong that I was always able to do all my own work—never suffered like so many do. While the 'Favorite Prescription' strengthens and keeps the prospective mother well, it is also helping to make the child healthy and strong. I would not think of going thru the ordeal of motherhood without taking the 'Prescription.'—Mrs. Charles Gussell, 1639 St. John St. Send 10c to Dr. Pierce, Buffalo, N. Y., for trial pkg. of Tablets.

"Bantus" A Bantu is a member of one of the great family of Negroid tribes occupying Equatorial and southern Africa. These tribes include, as important divisions, the Kafirs, Damaras, Bechuanas, Swahilis and many tribes whose names begin with Aba, Ama, Ba, Ma, Wa, variants of the Bantu personal prefix Aba, as in Bantu, or Abantu, itself a combination of this prefix with the syllable -ntu, a person.

In Legal Phraseology

"And does your young lawyer flance write you nice letters?" "In a legal way, yes. He says I have beautiful eyes and is constantly alluding to what he calls 'the forehead eyes, orbs or visual organs.'"—Boston Transcript.

GIRLHOOD TO MOTHERHOOD

Iowa Woman Found Lydia E. Pinkham's Vegetable Compound Always Helpful

Vinton, Iowa.—"When I was seven-

teen years old I had to stay at home from school. I finally had to quit school. I was so weak, I suffered for about two years before I took Lydia E. Pinkham's Vegetable Compound, then I picked up one of your books and read it. I began taking the medicine. Now I am a housekeeper with

six children, and I have taken it before each one was born. I cannot tell you all the good I have received from it. When I am not as well as can be I take it. I have been doing this for over thirteen years and it always helps me. I read all of your little books I can get and I tell everyone I know what the Vegetable Compound does for me."—Mrs. FRANK SELLERS, 510 7th Avenue, Vinton, Iowa.

Many girls in the fourth generation are learning through their own personal experiences the beneficial effects of Lydia E. Pinkham's Vegetable Compound. Mothers who took it when they were young are glad to recommend it to their daughters.

For over half a century, women have praised this reliable medicine.

WHY LOSE THEM?

WHITE CROSS CHOLERA CONTROL

recently discovered by Vets. army science. WILL STOP YOUR LOSS FROM Cholera, Typhoid, Diphtheria, Whooping Cough, and Black-bone in Turkey. The formula has been tested and recommended by the U. S. Army, including the U. S. Marine Corps. A bulletin on cholera diseases given with each box, \$1.50 per box. Also a booklet on the prevention and control of cholera in the home, one box to 25 cents. (In 10 boxes, one box to 25 cents. Short treatment, one first step, of disease. Sold with money back guarantee.

You Are the Judge! Stop This Loss

WHITE CROSS LABORATORIES - WALNUT, ILL.

Boschee's Syrup

has been relieving coughs due to colds for sixty-one years.

Soothes the Throat

loosens the phlegm, promotes expectoration, gives a good night's rest free from coughing. 30c and 90c bottles. Buy it at your drug store. G. G. Green, Inc., Woodbury, N. J.

It is one of the mysteries of life how two men can strike a bargain and both get the worse of it.

A wise man can point out thousands of things that he doesn't want.

The Best Laxative He Ever Tried

Mr. W. J. Dorion, New York, writes: "Sick headache, indigestion and constipation have troubled me for years. I tried everything but I can truthfully say your CARTER'S LITTLE LIVER PILLS is the best laxative I have ever used. I find that they are small, easy to take and their action does not pain me. They keep me regular and I want to tell you how I appreciate this purely vegetable medicine, knowing, due to my experience in laboratory work that laxatives, containing Mercury, Calomel and other poisonous drugs are injurious."

CARTER'S LITTLE LIVER PILLS are sugar coated, small, easy to swallow, and everyone in the family can take them in perfect confidence as they are a doctor's own formula.

CARTER'S LITTLE LIVER PILLS in red packages 25c. and 75c.

News-Bulletin Territory Shows Industrial Development

The year 1927 has witnessed a very noticeable awakening in the industrial line in the communities in which the News-Bulletin circulates.

This entire region is on the verge of a big development within the next few years and with the building of concrete roads in Cook County up to the borders of Will county and with hard road sentiment on the increase in Will county, it will not be long before more subdivisions will be laid out and new people brought here and this will mean more business for the communities and make their development.

Many very attractive homesite are to be had in the various sections of the News-Bulletin territory comprising the towns of Mokena, Marley, New-Lenox, Orland Park, Worth, Palos Park, Oak Lawn, Tinley Park and Frankfort.

In view of the fact that some of these towns have shown quite marked development within the past year, the News-Bulletin deemed it a feasible time to issue this special industrial edition giving a resume of the various activities.

The Public Service Company of Northern Illinois has contributed a very timely article on the extension of the gas mains of this company from Blue Island to Tinley Park, Mokena and Frankfort. This article also gives some interesting facts and figures relative to the use of gas. This article is also illustrated with a fine view of the gas plant at Blue Island which supplies the territories named with gas.

Another noteworthy factor in the industrial development is the better transportation program of the Rock Island railroad, who are spending \$100,000 on new signals and switching equipment so that both tracks of the main line from Blue Island to Joliet can be used for operating trains in the same direction, that is both the east and west bound mains can be used to run trains on east bound and both for west bound trains.

If trains are going say eastward and a freight train has the right of way, a passenger train following will not be delayed waiting for the freight to go in a side track, but instead the passenger train can be switched over on the west bound main, around the freight train, and switch over on the east bound main at the next station. In this way both trains are kept running and

there is no loss of time for either one.

Mokena being the central point between Blue Island and Joliet has been selected for the switching over of trains. The Mokena depot has been enlarged, tower mechanism has been installed and three operators will be employed here all the time. The Rock Island has also been kind enough to give us the opportunity of publishing an article by one of their foremost engineers on this subject and photos are also shown of the new signal installations.

The progress that has been made within the past few years in the development of the territory adjacent to Chicago, is indicative of still greater developments within the next few years. All of this section is bound sooner or later to become some of the finest residential sections of Chicago.

The unlimited growth of Chicago ever pushing out this way and it is only a matter of time, and perhaps short time, before the towns in the News-Bulletin territory will be built up like other out lying districts of Chicago have been within the past ten years.

Ten years more will mark a vast difference in all this section.

Farms are gradually disappearing and in their stead are springing up sub-divisions which in turn soon blossom out with many happy homes of city toilers, and men of wealth as well for that matter.

The News-Bulletin has tried to present as many features of special interest at this time on the development of the territory named as we have had the time to secure and prepare.

This summer has seen activity in the business line in Mokena. Early in the spring Peter Michelsen opened an oil filling station and ice cream parlor on the site of the old Schenkel homestead south of Mokena on Wolf Road.

Mr. Michelsen has been very liberally patronized and his business has developed wonderfully during the summer. In addition to ice cream and soft drinks, he has established quite a reputation for extra good juicy hamburger sandwiches and the demand for them is constantly growing.

In addition to handling oils, gas, etc., Mr. Michelsen has had a mod-

ern pumping apparatus installed and is now equipped to furnish free air for auto tires.

Mr. Michelsen has just built living quarters to his ice cream stand and lunch room and has sold his home further up Wolf Road.

Mr. Michelsen is going to serve hot drinks and food during the winter and no doubt, his place known as "Pete's Place" will be as popular in the winter time as it has been during the summer.

He has also made a hit with his chicken dinners for which he has many orders.

Mr. Michelsen is a good town booster and is ever at the forefront in any movement which stands for the betterment and advancement of his community. He has been instrumental in stirring up much interest in hard roads in this section.

Mokena has a fine future ahead as a good town for desirable home sites. During the past summer a Chicago woman purchased a 28 acre tract of land from Ed. McGovney and is having homes built to sell. Thus far four new homes have been started with a promise that a fine new stuccoed colonial house is to be erected on this property.

This is another step forward in the development of the community as a home site.

Two more new business places have opened in Mokena of late. Martie & Homerding have opened an up to date ice cream parlor and confectionary store and pool room in the Schiek place well known as the old Blazer home. Walter Homerding and Willard Martie comprise the new firm and both are good hustlers.

Within the last few weeks Mokena has lost one business by way of Mrs. Florence Hamilton giving up her hog shop in the former drug store building and Fred Leonhardt of Frankfort has opened a shoe shop in this place. Mr. Leonhardt needs no introduction to this community, having conducted a shoe shop here before. His many friends are glad to see him back in their midst again. His shop means one more business establishment for Mokena.

Mrs. Chas. Bock has opened a boarding house and lunch room in the Sutter building. Home baking is made a specialty.

Let's consider
hardwood floors

You can't realize how much hardwood floors will improve your house—until they're actually laid. They're attractive and they make housework so much easier.

We can show you how you can have hardwood floors with the minimum expense. Our service gives you the benefit of our long experience in handling materials and dealing with contractors.

Christmas is Coming

The News-Bulletin has been hand-

ling Christmas Greeting cards for a

number of years, but this year our

line will far surpass anything we

have ever offered. We have some

advance samples on hand now. Prices

range from cheapest to highest

prices. Eighteen greeting cards, no

two alike with your name printed on

the cards for \$1.50. Set of twelve

greeting cards of more fancy design

with envelopes and your name printed

on the cards for \$2.00. Then we

care a wonderful line of more ex-

pensive cards. It may seem early but

Christmas time will be here before

we know it. Stop in and look over

our line of Christmas greeting cards.

MOKENA

A company of relatives gathered

last Saturday night at the home of

Mr. and Mrs. Tom Homerding, Sr.,

to celebrate the latter's birthday.

A very good time was had.

J. G. Oswald has purchased a

new truck for use in his concrete

contracting business.

Mrs. Bertha Wallace has moved

here from Joliet.

Tom Homerding, Jr., has moved

upstairs in the Ed. Walsh place.

The Lutheran Ladies Aid are

busily engaged preparing for their

annual bazaar to be held in the

parlors of the church on Nov. 10.

Mrs. Florence Mahoney who has

been confined to her bed for over

six years, is not getting along as

well as her friends would like to

see her do.

Mr. and Mrs. Elmer Cooper visited

in Evanston Friday with Rev.

and Mrs. Glen T. Beaty and on

Saturday attended a football game.

Charles Sylvester who has been

staying with the Don C. Hall family

and who has been conducting a

rug weaving business, will start up

in business in Plainfield Nov. 1st.

Mrs. Lizzie Moriarty leaves the

first of November for Lynn Haven,

Florida where she will spend the

winter with her sister, Mrs. Sadie

Barbour.

Mrs. Fred Klatt Sr., was hostess

to the members of the "500" card

club last Wednesday afternoon.

Prizes were awarded to Mrs. Wm.

Lathrop, and Mrs. Harry Mall. A

dainty luncheon was served by the

hostess assisted by her daughter

Mrs. Andrew Cappel and Miss

Gladys Cappel.

Several relatives were entertained

Sunday by Mr. and Mrs. John

Mattes, complimentary to the birth-

day of Mrs. Mattes. Dinner was

served to eighteen guests.

Mr. and Mrs. George Koeller and

family were entertained at the

home of Mr. and Mrs. Joseph Gee

of Orland, Sunday.

What Is Being Done on Paving Work In Southern Cook County

By Charles M. Hayes, President Chicago Motor Club.

Last November the people of Cook County voted a bond issue of \$10,000,000 for the widening of existing highways and for the building of new highways in the county. In order to make the bonds valid enabling legislation was necessary. Unfortunately, this bill was one which was not passed until late in the session, and work was held up until the law became effective. Now that this formality has been attended to, nothing should stop the progress of road widening in Cook Co.

The citizen's committee appointed by Anton J. Cermak, president of the county board, put itself on record as favoring the immediate widening of existing highways. The work of building wider arteries of travel was considered of more importance than the building of new roads, although the building of new roads is part of the program. Prior to the passage of the bond issue the Chicago Motor Club secured the pledges of the county commissioners and of candidates for election, in which they promised that they would use their best efforts in pushing the road construction plan to completion, and that the widening portion of the program should have primary consideration.

Congestion on the highways leading to Chicago is the result of narrow two-lane roads. One lumbering truck can hold back miles of faster moving traffic. It has been found that the building of new roads in many instances but adds to the traffic jams on some of the existing roads. What we need is road widening.

Motorists accustomed to the Sunday jams involving constant stopping and starting, the use of low and second gear, the heat and the noise of idling motors, and the long periods of waiting for the interminable line of cars to get into motion, will readily appreciate the comfort to be had in wide roads; however, far more important than the saving of time and money, is the reduction of accidents, and the saving in life that will come with

wider highways.

Years ago, and in fact in some circles, even today, stress was placed on the regulation of motorists for the purpose of reducing accidents. More recent and enlightened accident prevention thought realizes that sufficient regulatory measures are on our statute books today, and that instead of a mass of regulations we are in need of highway building for safety.

Suburban car tracks in Western Avenue from 135th to 147th streets are to be torn out by the county highway department and a new forty-foot concrete highway constructed. Plans have been completed and there is a chance work may be started this fall.

That was one of the developments at a meeting in the Palmer House, where the Southern Cook County Highways Improvement Association was organized, with Charles M. Summers, of Harvey, chairman.

More than sixty business and civic organizations were represented at the meeting, one of ten called by the Chicago Motor Club, and out of which have come demands and plans for the new Southwest highway, and the Avondale highway to the northwest.

The announcement of the Western avenue plans were made by A. R. Scheffo, representing Maj. George B. Quinlan, of the county highway department.

"Why is it," demanded Summers, "that the great South Side, which pays two-thirds of the taxes, and has the bulk of the population, can get no highways?"

That was the keynote of the meeting. In addition to the 40-foot pavement on Western Avenue, Mr. Scheffo said plans are being completed for widening the street from 147th to 183rd.

The meeting named an executive committee, to become part of the citizens' advisory committee to the county commissioners, and determined to fight for the widening and improvement of both Halsted street and Western avenue to the south Cook County line.

Peanuts Figure New Orland Park Industry

The lowly peanut is the basis of a new industry which has sprung up in Orland Park within the past few months. During the early part of the summer Fred Dunlap and Walter Munch of Palos Park and A. W. Schmaedecke and Gordon Powell of Orland Park, conceived the idea of putting out salted peanuts in a new form. They call their product "Peanoits" instead of just common peanuts.

After the idea was conceived the next move was to get up a new form of vending machine to dispose of the peanut product.

The device decided on was as follows: a glass jar with a cover on it, the jar being mounted on an iron stand. Across the panel part of the stand was the wording "Taka Tasty Peanoit" 5c. The salted peanuts were then put up in waxed paper sacks and sealed with a diamond shaped sticker on which was printed the words "Taka Tasty Peanoit".

At first these vending devices were placed in stores, ice cream parlors, etc. After a few weeks orders came in for "Peanoits" and continued to do so until finally Chicago jobbers became interested in "Peanoits" and finally took over the distribution of them.

Shortly after the new industry was started 10,000 bags of "Peanoits" were sold and the sales have run into many thousands since then. Jobbers often send an order in now for 18,000 to 20,000 bags of "Peanoits".

The novel way in which the salted peanuts are being put out has taken so well that the originators of the idea rented a large store room in the Zerbis brick building facing 143rd street in Orland Park in which the "Peanoit" headquarters have been established. Here the peanuts are sacked, the wax bags are sealed and counted out and then placed in the glass containers which the jobbers distribute.

An ingenious home made device is used with which to fill the wax bags.

The peanuts are poured into a large funnel which feeds into a hopper like affair. A lever operated with a spring lets just enough peanuts run out of the hopper to fill the bag, after which the bag is sealed and passed on to the packer. The "Peanoit" promoters are planning to install a machine which will fill and seal the sacks all in one operation.

A number of women and girls are kept busy every day filling "Peanoit" orders. A very clever sample of the vending device has been made up and is placed in a neat leather case for salesman demonstration purposes.

At the rate the peanoit orders are pouring in this new industry will develop into a worth while business.

Presented Big Birthday Card

The following verse on a big home made birthday card was presented to Peter Michelsen at his birthday celebration last Saturday. The card was signed by fifty friends BIRTHDAY GREETINGS TO A GOOD SCOUT

Dear Pete:
We've hunted everywhere,
To find a card for you;
But wishes on the regular cards,
Would never, never do!
And so we send this home made card—
Without a wish, 'tis true,
Cause darn it all—there's no wish
That's good enough for you!

NEW LENOX

The Ladies' Aid Society will meet at the Church on Wednesday afternoon at 2:30 o'clock. The president requests that all outstanding bills be in the hands of the treasurer before this meeting. It is also requested that the committee chairmen of the bazaar be present and report the work of their booth.

Scout meeting Monday evening, 7 o'clock. Patrol competition will run throughout the entire evening's program. Patrol leader's, have all your gang present so your patrol will make a good showing.

Mrs. J. E. Francis and Mrs. Gallowsay attended the Methodist Women's Association which met at Ottawa Street church, Joliet, Oct. 19th. They reported a very interesting and helpful meeting of the women of this district.

The Ladies Aid bazaar held last week in the Methodist church netted over \$275. A vacuum cleaner for the church has been purchased by the ladies.

The next picture to be shown at the M. E. church next Friday night will be "Going Up" as a feature, also two reels of Pathe News Review will be shown.

The week from Nov. 6 to 13 is "Father and Son Week". How about a nice hike with the boys, fathers? The choir meets next Thursday night. A business meeting will also be held.

Work on the Boy Scout Cabin is being pushed right along.

Polar Region Cold

Theoretically it can never get much colder than 60 degrees below zero at the North pole, which lies in deep ocean. The cold pole of the northern hemisphere, far from coinciding with the North pole, is believed to be on the continent of Asia north of Irkutsk, where the temperature is said occasionally to fall to 90 degrees below zero F.

THE NEWS

Butt of the Joke

One of the agriculture study classes in the Scipio schools had been studying sheep, and one of the test questions required that four breeds or kinds of sheep be named. One boy could recall three kinds, but not the fourth. Finally, in desperation, he added, "hydraulic ram."

Sizes of Continents

Europe forms only about one-fourteenth of the land surface of the globe. Asia extends over nearly one-third of the land surface of the globe. Africa has about three times the area of Europe. North America is a little less than twice the size of Europe; and South America is a little more than 1 1/2 times the size of Europe.

Children and Freckles

Children are not subject to freckles before the fourth year of life. Freckles appear along about the years when their absence would best fit the social requirements of our race and climate.—Hygeia.

Temptation to Ghosts

If the dead can come back and move tables, why don't they tip over some of the hideous bronzes erected to them?—Detroit News.

Effort of Education

Criminals are said to be better educated than formerly. Thus, every day, in every way, the world gets better and better.—New York Evening Post.

Lack Stability

Fortunes made in no time are like shirts made in no time: it's ten to one if they hang long together.—Douglas Jerrold.

So Talking Is Hot Air

A physicist has calculated that if 1,000,000 persons were to talk steadily and the energy of their voices were converted into heat, they would have to talk an hour and a half to produce enough heat to make a cup of tea.

Timid Creatures

When women engage, in my presence, in their favorite amusement of abusing the men, I say: "Ladies, spare my blushes. Permit me to retire while you do us justice."—E. W. Howe's Monthly.

Knowledge Is Power

Learning makes young men temperate. It is the comfort of old age, standing for wealth with poverty, and serves as an ornament to riches.—E. change.

Consolation

The journey through life goes through many dark tunnels, and the darker and longer they are the more we appreciate the glory of sunshine afterward and the grandness of the view.—A Woman's Confessional.

Uncle Eben

"It costs me to live and it used to," said Uncle Eben, "but dar's mo' enjoy ment in life."—Washington Star.

Criticism's Object

The legitimate aim of criticism is to direct attention to the excellent. The bad will dig its own grave, and the imperfect may safely be left to that final neglect from which no amount of present undeserved popularity can rescue it.—Bovee.

Avoid Disappointing It

"The immoderate use of chewing gum may lead to stomach disorders," says a physician. This is easily understandable. When the jaws begin to work the stomach naturally looks for something to come down, and gets peeved if it doesn't.—Boston Transcript.

ORLAND

STRAYED ON MY FARM—A grey horse. Owner can have same by identifying horse and paying for this adv. Arthur Steffes, Orland, Ill.

NEW LENOX BUILDING NEW \$40,000 SCHOOL

New Lenox is keeping pace with the demand for a larger public school to adequately care for the many pupils who are being enrolled in this school as the village is growing in population.

Last spring the citizens of the New Lenox school district voted on a new school site and new school building representing an investment of over \$43,000.

The new school building which is now under construction is very well planned so as to take care of the future. The structure is to be a one story building so arranged that additional units can be added to it as time may require.

The building is being built of concrete and glazed tile for the walls. There will be three school rooms. The building is 100x90 feet. The building will be fireproof. The floors will be all concrete. The rooms are well lighted and there will be plenty of ventilation.

The building will be heated by a hot air furnace. The rooms will be

all equipped with electric lights and running water. A well has been drilled on the school grounds and water will be pumped into a pressure tank by an electric motor.

One of the features of the new school will be an auditorium 80x60 feet equipped with a stage which will be used for class plays or public gatherings.

The roof will be fireproof being covered with asphalt shingles.

The new school is a credit to New Lenox and will be one of the best school buildings of its kind in Will County. The contract calls for the completion of the school house by January 1, 1928.

The old school will be used up to the time when the new building will be ready. The old structure was built in 1869. It is a two story frame building and was built at a cost of \$3,000.00 Prof. Frank Seales was the principal of the school and employed an assistant during the winter season.

New Bank Big Asset to New Lenox Community

The biggest asset New Lenox has gained this year is the New Lenox State Bank which was opened October 3rd. The bank was organized last spring with New Lenox, Joliet and Mokena men interested in it.

The bank building was located on a fine building site was chosen in the heart of the village along the Lincoln Highway. The bank is a

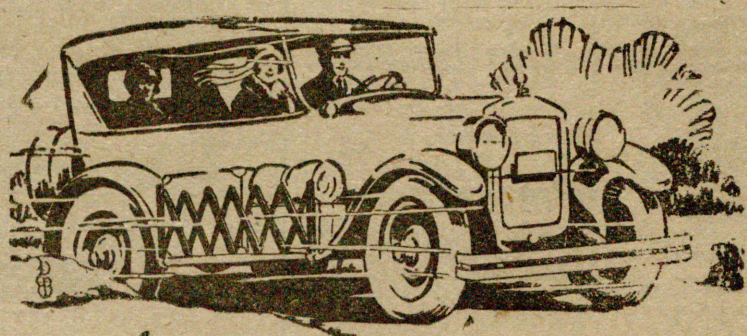

story brick building. The upper floor is being rented now for a flat. Later on it is planned to rent these quarters later to the telephone company for their local exchange, same as has been done in Orland. The new bank is a great convenience to all of the community. Many Joliet are depositing in this bank. Ceward W. Batson is the cashier.

52 Billion Loaves in U. S. Wheat

ENOUGH wheat will be produced in the United States this year to make 52,018,000,000 loaves of bread, according to the Sears-Roebuck Agricultural Foundation. The latest official estimates indicate that 839,000,000 bushels of wheat will be produced this year, and it is figured that 62 one-pound loaves of bread can be obtained from every bushel of wheat. Of the total estimated output 626,000,000 bushels were produced by winter wheat growers and 212,000,000 bushels by spring wheat growers in the Northwest. Last year the winter wheat production was 396,000,000

bushels and spring wheat 271,000,000. The present crop is above the five-year average of 802,000,000 bushels. The acreage devoted to the crop this year is put at 57,584,000 and the latest estimates place the production at 14.6 bushels per acre, the Foundation states. Winter wheat will run over 17 bushels per acre and spring wheat 10.2 per acre. Domestic needs are estimated at 640,000,000 bushels, so there will be more than 200,000,000 bushels for export. Prices are not as high as a year ago, but the crop probably will bring growers more than a billion dollars.

THE HEART OF YOUR CAR

Is the motor. How it "Pulsates" in getting the utmost driving power out of the gas flowing into it-how it acts under both severe climatic and road conditions-are matters of vital import. Untrained hands should never tinker with it. If you're having difficulties of any kind with it, drive into this Garage and let us test and adjust it. First class repair work.

"Radio's Greatest Values"

Perfect Tone

THESE ARE THE VALUES FOUND IN THE

Buckingham Radio

All Buckingham cabinet models are equipped with the newest and finest of long air column orthophonic speakers, which give the most perfect tone quality possible to obtain in radio. This feature alone makes the Buckingham an outstanding value, as tone quality and faithfulness of reproduction are the most important things to look for in choosing your radio receiver. Have your dealer actually show and demonstrate to you the beautiful Buckingham line, so that you can make your choice personally on the floor of your dealer's salesroom.

Motor Inn Garage, TINLEY PARK, ILL. C. A. Steinhagen, Prop

Public Service Co., Lays 22 Miles of Gas Mains to Serve Rural Communities

TINLEY PARK, MOKENA AND FRANKFORT ENJOY QUICK AND CLEAN HEATING SERVICE

Residents of Mokena, Frankfort, and Tinley Park now are enjoying the added convenience of unlimited gas service, following the completion recently of an extension of approximately 22 miles in the gas system of the Public Service Company of Northern Illinois. These communities in which gas never before has been available - will receive their supply from the Public Service plant at Blue Island, and a compressor station at Burr Oak, through a high pressure main.

It is estimated by the company's engineers that the main forming the extension is of more than ample size to take care of these communities for 25 years. In addition, the company's gas system is interconnected with that of the People's Gas, Light

and Coke Company, thus assuring the customer of a never-failing supply.

Construction of the gas main bringing service to Mokena and Frankfort started at Tinley Park (to which point the extension was completed in February) on April 22, 1927, and was completed and ready for operation June 30, 1927. This establishes a new Public Service record for speedy construction over distance greater than a mile. The new record is an average rate of 1,000 feet of transmission main per day. Besides this, a new record for one day's work was set when 5400 feet of main were laid and 4700 feet of trench dug. Steps were taken to increase the life of the gas main by applying special treatments for

the prevention of rust. One half of the pipe line was treated with an enamel coating applied hot, while the other half was treated with a grease coating and muslin wrapping. Many labor saving devices were used to speed and facilitate the laying of the main. Among these were a trenching machine to dig the ditch a back-filler to cover the main after it had been laid, a water pump, and an air compressor, for general use.

In keeping with the latest practice all joints were welded, a special welding iron imported from Norway being used for this purpose.

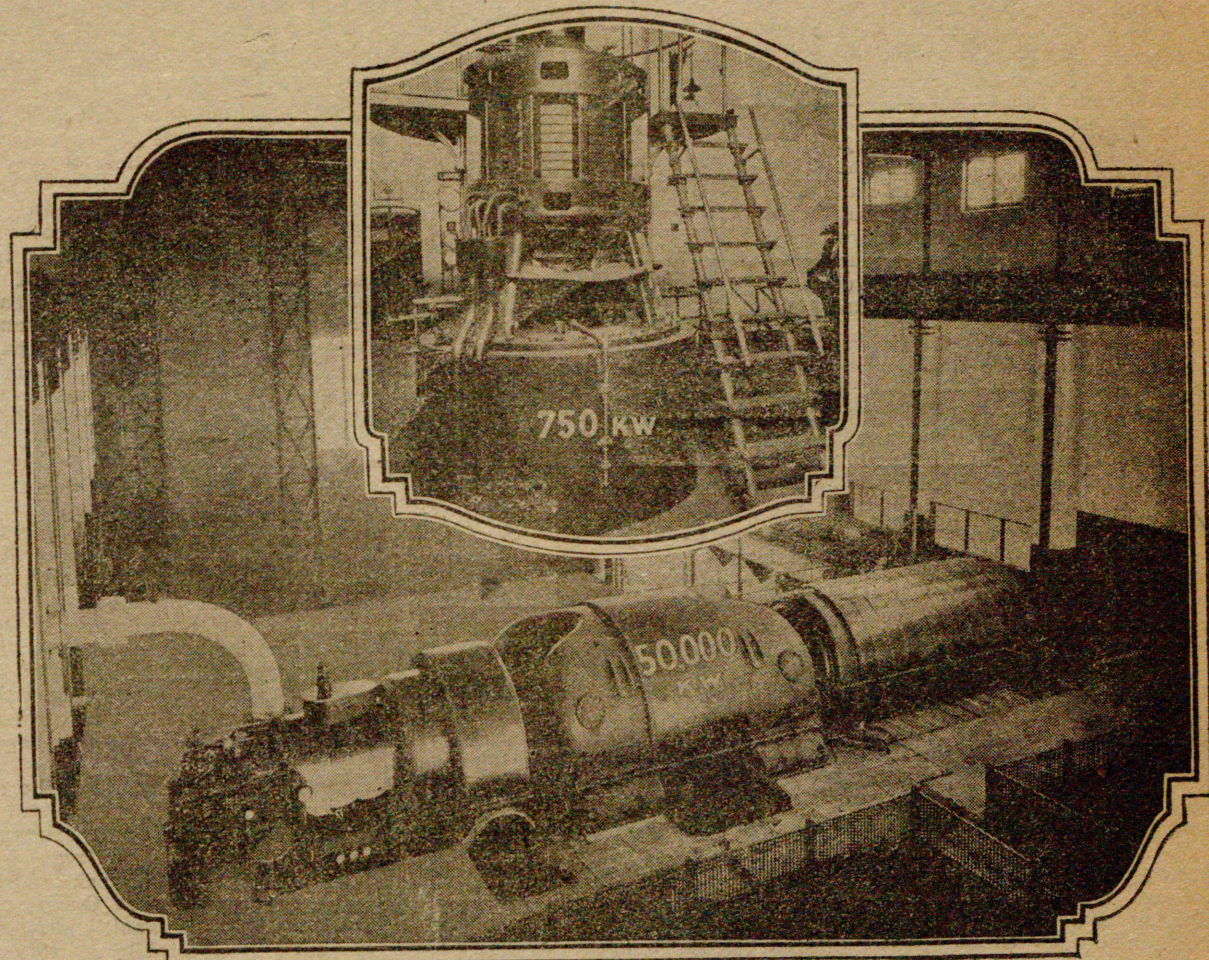

Pressure in the transmission mains is maintained at approximately 40 pounds per square inch. This is reduced to a pressure suitable for house consumption by individual regulators installed in the customers' premises. The regulator operates automatically to maintain a satisfactory pressure.

The importance of gas as a factor in the development of Tinley Park, Mokena, and Frankfort, is best determined by an examination of data and facts concerning gas service.

Within recent years the character of gas service has radically changed. In the lighting field where gas was once supreme, electricity has taken its place. Gas, however, instead of being dealt a death blow by this substitution has found other fields so successful that the gas output today is many times what it would have been had it retained its position in the lighting field.

Gas finds its greatest use in the home as a fuel for cooking and heating, and in industry for firing furnaces and heating devices used in special manufacturing processes.

The past few years show a remarkable increase in gas consumption. At the end of 1923 the Public Service Company served 87,197 gas customers. During 1924, there was added

One of the large generators of the Public Service Company which supplies a large territory with electrical energy.

PUBLIC SERVICE COMPANY OF NORTHERN ILLINOIS

310 Van Buren St., Joliet
Telephone 636
L. C. Stephens, District Manager

8,498 more customers. In 1925 the increase was still greater with the addition of 10,182 customers during the year. With the taking over of the Chicago Heights Gas Company the increase has been equivalent to the addition of a town of 30,000 people to the company's gas system. This makes a total of 126,626 gas customers served by the Public Service Co. The industrial load also has increased rapidly, being 44 percent greater than in 1925. Heating homes with gas has grown by leaps and

clean that re-decorating bills are reduced to a minimum. Cleaning of curtains, draperies, rugs, etc., is not necessary except at intervals. A Tinley Park physician was one of the first in these communities to have a gas-fired furnace installed in his home.

Among other advantages residents of these communities may expect from the use of gas, is the gas hot water heater, producing hot water whenever desired. Garbage, the haven of disease at

This Plant Furnishes Gas to Tinley Park, Frankfort and Mokena.

bounds. In 1924 there were 119 customers on the company's mains with gas-heated homes. In 1925, 237 were added. In 1926, 476 more were added and on August 1, 1927, a total of 1176 customers were being served with gas for house-heating. This means the house-heating load has increased nearly 100 percent in three years.

Reasons for the growth may be assigned to many causes. Property values have increased in gas-using communities. The "smoke gvil" is banished. Convenience, cleanliness, added leisure hours and more available basement space are a few of the many advantages added to the home by the use of gas for fuel.

The company handles, installs, and services especially designed equipment for the use of gas as a fuel.

The operation of a gas-fired heating unit is automatically controlled by the temperature in the home acting on a thermostat. Regardless of weather conditions outside, the temperature is maintained at any desired point. The gas-heated home is so

ugliness can be quickly and cheaply disposed of by the gas incinerator.

In the laundry the gas burning laundry stove, and the gas-fired clothes dryer, which dries, bleaches, and sterilizes the clothing, put an end to the old-time inconveniences of the laundry.

In the kitchen the gas range with a thermostatically controlled oven enables the housewife to cook a whole meal of an improved quality because of even heat, without the constant attention formerly required.

More and more industries are turning to gas as the most convenient, cleanest and easily controlled fuel. Residential towns with gas service are able to attract industries, which because of their use of gas for fuel, are clean and desirable.

An added service to the gas consumer is given by the American Gas Association laboratories. In these laboratories gas appliances are carefully tested as to their worth. This means that the gas consumer may be assured of high grade goods when he purchases these tested appliances.
